Thank you for your reply.

I would be happy to issue a proforma invoice for 2 x 0110452.

We can issue a proforma invoice with an invoice address in the Philippines and a delivery address in the UK. I could use USD or UK £ if you prefer. The price in UK£ is £113.70 each when purchasing two sensors.

If we deliver to a UK address, **I would need to charge VAT**. This can be claimed back if the sensors were exported and you were able to send us proof of export. The VAT cannot be claimed back though if a friend is taking them overseas in their luggage.

If you are able to give me your delivery address and invoice address and let me know which currency you prefer, I would be able to email you a proforma invoice this afternoon.

We accept payment by bank transfer or Paypal (6% fee).

Alternatively, if you would like the sensors to be shipped to a **UK address**, you can order and pay via our website <https://www.viamed.online/>

The price would be £116.50 each this way.

Kind regards

Subject: Re: New customer message on June 28, 2026 at 12:33 pm

Thank you for your reply, there are two versions of the MAX-550E

0110452 (R140P02) is a Max-550E for use with **MaxO2 ME** oxygen monitors. It is supplied complete with a standard 15mm I.D. flow diverter (0120095).

0110454 (R140P02-001) is a Max-550E for use with MaxBlend devices (MaxBlend 2, MaxBlend Lite and Blender Buddy 2). It is supplied complete with a special flow diverter which is narrower in diameter and has a small bleed hole (0120086).

I will assume you require part number 0110452. The price is \$118.20 each EXW. This sensor is in stock and it is dated September 2025. The warranty is 24 months from date of invoice. It also has a long sensor life of >1,500,000 oxygen % hours.

If you require a proforma invoice detailing carriage charge, bank charges and insurance, I would need your invoice and delivery addresses in order to issue a quotation or proforma invoice.

Many thanks.

Kind regards

Good afternoon,

Thank you for your enquiry.

In order for me to assist you further, I would need to know which sensor/s you are interested in.

Kind regards
