Hi John

Thank you very much for your order.

All the items are available from stock.

Please find a proforma invoice attached. If you are happy to proceed, please make your payment to the bank details at the bottom of the invoice or give us a call with your card details.

I look forward to hearing from you.

Kind regards
Ryan

Subject: Re: VN202 mkII Oxygen Analyser (7910100)

Hi John

Thank you very much for your email.

In your industry I would expect you to get 2+ years out of one of our O2 sensors. We recommend putting sensors in to use within 6 months of purchase, so we would not recommend purchasing spare sensors just yet. Please also note that we nearly always have these sensors available from stock, so in most cases we can dispatch the same day as receiving an order.

- VN202 (analyser and sensor) = £156 each EXW
- R-17VAN = £50 each EXW x 2

We currently supply a few companies that provide welding equipment, in these cases they often add their own accessories for pumping the sample gas out of the gap between the pipes, we supply some T Pieces to some of them.

Are there any accessories or adapters you require? I may be able to help if I can understand what tubing or accessories you are wanting to connect the sensor to.

I look forward to hearing from you, please do not hesitate to contact me if you have any questions.

Kind regards

Ryan

Hi

We are looking at purchasing some Oxygen Analysers and are looking at purchasing 5 to 10 off, we have tested the **VN202 mkII Oxygen Analyser (7910100)** for our application to check that there is no oxygen left in our pipe work for welding.

How long does the replacement sensor last if its left in its packaging, so we can keep in our stores

- **VN202 mkII Oxygen Analyser (7910100) Can you quotation for 5 off and 10off**
- **R-17VAN Oxygen Sensor (0110217) Can you quotation for 5 off and 10off**

Kind Regards

John Clarke
