Hello Ryan

yes, I didn't receive this email for some reason. Since the other sensor is urgent, let's finish processing my first order and organize its shipment first. I will find more information about the second one and share it with you. My request is that if payment by credit card is possible, we can process it today and organize the shipment of my first sensor order.

Thank you for your support

Dear Deniz

I believe the sensor in your picture is a KE-25, but it would be worth checking the label. The problem is that the KE-25 is no longer manufactured, they have replaced it with two new lead free sensors, but they are different to the original and not necessarily compatible. Please can you find out the exact model on the sensor label? Please can you let me know what sort of gases they are wanting to measure; will the O2% be over 30%? I will await your reply.

Kind regards
Ryan

Dear Deniz

I have spoken with our chambers of commerce and they tell me that the EUR1 is not applicable between the UK and Turkey. They used to issue an ATR, but since the UK has left the EU, we should just add the following declaration of origin to the invoice:

The exporter of the products covered by this document declares that, except where otherwise clearly indicated, these products are of US preferential origin.

If you are happy to proceed, we can provide you with a proforma invoice to include the Certificate of Origin.

I look forward to your response.

Kind regards

Dear Deniz

We have stock available, please find our distributor pricing below:

0110081 Oxygen sensor UFO 130-2 = USD \$166.50 each EXW

We can provide a certificate of origin, the cost for this would be \$87.50

It has been a long time since we provided an EUR1 document, I would have to obtain a quote for you. Are you sure this is required as well as the COO?

Just for your information the origin of the sensors is the USA.

I will await your response.

Kind regards

Ryan

Dear Ryan ,

Thank you for your kind reply

We currently urgently need 5 pcs. We need a price quote for 5 units and information on when you can ship them.

UPS is our preferred shipping method, but due to Turkish customs regulations, we will need the original invoice, COO and EUR 1 certificate along with the product. Could you please provide these documents?

We await your reply
