Dear Jean Pierre Reijnen

Thank you very much for your order.

Before we process your order I wanted to make sure you have selected the correct sensor, as the R-22DEM is rarely used these days.

The R-22DEM is for the original Analox O2EII (20+ years old) that was redesigned after a short period with different electronics that uses the R-33DE style sensor.

I have attached a leaflet where you can see the difference between the sensors. Please can you confirm which model you require?

Kind regards
Ryan
