

VIA MED

Envitec Oxygen Sensors Medical Vi

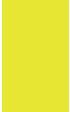

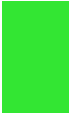

A medical device for measuring the proportion of oxygen
in respiration gases.

Class IIa
Via Rule 10
Assesment Route Annex II

Carried out by Derek Lamb

Comments on Suppliers:

Supplier review up to date,
Teledyne a quirk due to once being a supplier
00070006 is Viamed account

Comments on Returns:

very small number of repairs from customers,
no cause for concern.

Comments on Risks with Returns and Potential Re-work:

not applicable, no rework possible

VIAMED Management Meeting - Other
0110021 as component to 0110232?

Issue ID #104385

Date Created 02/Oct/2017

Issued To: Derek Lamb

Completed Status: 06 Oct 2017

Notes:

Added by Steve Nixon sent to Derek Lamb

Who has linked 0110021 as component to 0110232 (Vandagraph R-22VAN).

We had been using 0110132 for R-22VAN and now Jean buys direct from Envitec.

03 Oct 2017 Derek Lamb

will have been automatic, will see if i can filter it out

04 Oct 2017 Steve Nixon

I don't see how it can be automatic, this shouldn't happen.

06 Oct 2017 Derek Lamb

some time this year vandagraph purchased medical sensors and converted to r-22van, as the conversion process utilised the product tables, the system has flagged as a component part ...

i've manually filters the 0110232 in this case, if it starts happening alot i might have to do some creative filtering

The following concerns an enquiry from Rich Gray at Spectrum Medical.

On 24 August 2017 at 08:26, Rich Gray <Richard.Gray@spectrummedical.com> wrote:

Hi,

I have taken over from my colleague Ben with the development of the Gas Monitoring products at Spectrum Medical. We are currently using your R-22MEDV.

We aim to provide a storage temperature range 00C to +600C for our products. The datasheet you have provided for R-22MEDV states 00C to + 500C.

We are going to complete testing of our product to 00C to +600C range. What is the likely impact of storing the cell at a temperature above that stated in the datasheet?

Thanks

Rich

Hi Rich

The main thing to be wary of is that we have not specified the performance over 50 degrees, the primary concern is the performance of the temperature compensation network.

If you are storing above 50 degrees then this could affect the electrolyte, the most probable effect would be to increase the consumption of the sensor and thereby reduce the effective life span of the sensor during use. You could perhaps counter this by using the R-22Vi instead, which has a longer life span (>1,000,000 oxygen % hours), but the response time is longer: <12s as opposed to <5s. Is a longer response time acceptable?

Hi Steve,

Do you have any reports showing how the sensor output voltage depletes over time in Air (Or any concentration graph). We will get round to running an experiment here but would be good if you had some data available.

Thanks

Rich

05 Sep 2017 Steve Nixon

See attached lifetime storage test graphs for OOM103 and the equivalent sensor 0110021.

Envitec don't carry out long term testing of just the output, i.e. to show a gradual decrease. They carry out more relevant testing against the specifications.

05 Sep 2017 Steve Nixon

See attached document prepared for Spectrum Medical. This can be used for other customers.

06 Sep 2017 Steve Nixon

Next Action Changed From Steve Nixon To Derek Lamb Derek, as discussed do you want to add the docs to the technical file.

Dear Ryan,

Thank you for your email and sorry for my late reply.

The new oxygen sensors are working well.. Now we don't have to cut the top part of the sensor to fit it with Atom incubator..

Thanks & Regards

INFORMATION ONLY ISSUE DO NOT ADD NOTES!

It looks like we now have in stock the initial batch of R-22VA oxygen sensors for use with Atom incubators:

0110039

0110073 (matched pair)

JC - Please can you make up say 10 - 20 matched pairs to start with.

CH - We need images for marketing and datasheets...

The pricing should be competitive!

The original Atom OEM sensors are produced by Teledyne, so Atom and their customers will no doubt be experiencing delays and they have recently been subject to a price increase.

0110039, 0110073 Atom oxygen sensors

Issue ID #113126

Date Created 25/Jan/2018

Issued To: Sophie Lines

Completed Status: 26 Jan 2018

Notes:

Copy Issue Main Issue #113115

Added by Steve Nixon sent to Derek Lamb

INFORMATION ONLY ISSUE DO NOT ADD NOTES!

It looks like we now have in stock the initial batch of R-22VA oxygen sensors for use with Atom incubators:

0110039

0110073 (matched pair)

JC - Please can you make up say 10 - 20 matched pairs to start with.

CH - We need images for marketing and datasheets...

The pricing should be competitive!

The original Atom OEM sensors are produced by Teledyne, so Atom and their customers will no doubt be experiencing delays and they have recently been subject to a price increase.

0110048 R-48V to order?

Issue ID #101450

Date Created 24/Aug/2017

Issued To: Jonathan Connor

Completed Status: 07 Sep 2017

Notes:

Added by Steve Nixon sent to Jonathan Connor

So far this year we have sold 187, but 100 have been to Heyer.

At the moment we only have 53 in stock. I suggest we order more (say 25 - 50) in case Heyer place another order soon. The stock will be used anyway in due course.

Also, we currently sell 143 of the MAX-3 version.

29 Aug 2017 Jonathan Connor
thanks

When we receive a purchase order for this sensor, please place the order on priority 8. Email the customer and explain the situation (I CC'd everyone in an example email, 26th June) which you can use, please read and make sure it applies to your customer first.

Hopefully, they will choose to accept the new sensor, if they still want 0110071, discuss with SJH before proceeding

Please can you tag the 0110071 R-22MEDV matched pair as superseded by 0110072 R-22Vi matched pair.

I have added memos to 0110022 and 0110071 to advise that we should offer the R-22Vi if they are to be used in incubators. Obviously we need to advise the customer of the part number change with a brief explanation, ie:

"The R-22Vi has been developed to have a longer operating life in the higher temperature environment found in incubators"

I have also removed 0110071 from the live GHX stock group.

Regarding the website, do you want to keep it low-key and have Catrin simply replace 0110071 with 0110072, or make a new page for 0110072 with an explanation on both pages explaining the improvements?

31 Jul 2017 Steve Nixon

Next Action Changed From Steve Nixon To Catrin Hird Opera updated. Catrin please keep it low key for now and add to web site:

0110020

0110072

21 Aug 2017 Catrin Hird

Next Action Changed From Catrin Hird To Steve Nixon Sorry I'm confused, R-22Vi is already on the website.

I have added search information so that it comes up when R-22MEDV is searched for. What else do you want me to do?

29 Aug 2017 Steve Hardaker

Now when you search on C2000 or Isolette, it brings up only the R-22Vi and not the R-22MEDV, so this would appear to be resolved.

Issued To: Steve Nixon

Completed Status: 31 Jul 2017

Notes:

Added by Katie Evans sent to Steve Nixon

As discussed with SJH, we have been offering 0110072 to hospitals ordering 0110071. When doing so, we are asking which piece of equipment they intend to use them with.

Would it be possible to add the R-22Vi to the cross reference so we can log which equipment they are being used with?

SO far, we have only had one response, so for your reference, Ormskirk General (Account 3980) are using it with the Air Shields C2000 incubator.

31 Jul 2017 Steve Nixon

Thanks, I've moved the most important ones from R-22MEDV to R-22MEDVi.

Let me know if it looks OK.

31 Jul 2017 Katie Evans

Looks great, thank you Steve

Showing as received in Opera, but not in Intrastats, why?

Something to do with transferring to matched pair stock?

JC, FYI I've ordered more stock.

26 Jun 2017 Jonathan Connor
Thanks for ordering.

0110020 and 0110072

Not seeing what you mean? We received a part shipment of 100, the 100 were booked in as singles then converted to pairs. We have 66 pairs in stock, 50 from this order and the remainder from the order of 40

Additional medical oxygen sensors to promote
Issue ID #90006
Date Created 24/Feb/2017
Issued To: Katie Evans
Completed Status: 06 Sep 2017

Notes:

Copy Issue Main Issue #89998

Added by Steve Nixon sent to Catrin Hird

We are to be promoting additional oxygen sensors, which have been included in the latest oxygen monitoring catalogue. We are also in the process of generating a new oxygen sensors poster.

The separate oxygen sensors leaflet has not been updated yet and I am in the process of generating the remaining datasheets.

See also the following notes:

0110018 R-17V

9-13mV, <5s, 500,000 oxygen % hours

0110019 R-17Vi

9-14mV, <12s, 1,000,000 oxygen % hours

0110039 R-22VA Atom Medical

9-13mV, <5s, 500,000 oxygen % hours

For use with Dual Incu i, Incu I, C81828-R22MATOM

0110073 R-22VA pair Atom Medical

9-13mV, <5s, 500,000 oxygen % hours

For use with Dual Incu i, Incu I, C81828-R22MATOM. Will also fit V-2100G and V-2200

0110020 R-22Vi

9-14mV, <12s, 1,000,000 oxygen % hours

0110072 R-22Vi pair

9-14mV, <12s, 1,000,000 oxygen % hours

0110025 R-23Vi

For use with Draeger I8000 Incubator, >750,000 oxygen % hours. Longer life version of the standard R-23V, in principle better for higher temperature incubator applications,

0110461 MAX-7L

3.5 – 7.5mV. Datasheet in L drive

0110465 MAX-24

>500,000 oxygen % hours. Alternative to 0110042 R-42V

0110452 MAX-550E

For use with Maxtec MAXO2 ME oxygen monitor. Datasheet in L drive

5620001 504877

For use with Precision Medical PM5900 oxygen monitor

Should you have any queries, please let me know.

Notes:

Added by Steve Hardaker sent to Steve Nixon

The Viamed R-22MEDV doesn't physically fit into an Atom Incu i Incubator, whereas the original Teledyne R-22MED does.

Please can you see if there is any way to add this information to the cross reference, as in this case we will need to supply 2x 0110022 with matched outputs >9.0mV instead.

06 Feb 2015 Steve Nixon

06 Feb 2015 Steve Hardaker

07 Dec 2015 Steve Hardaker

Created Related Issue #65435

Added by Steve Hardaker sent to Steve Hardaker

I've linked this to a completed issue (55659) as it appears that the solution documented on that issue has not actually resolved this.

The original issue was that the R-22MEDV does not physically fit into an Atom Incu-i incubator, the customer believed that the Teledyne R-22MED was fine, so we supplied those.

In the meantime, they had to order sensors from Atom so ours were put on a shelf. A year on, the PPMs have come around and they have found that the R-22MED also does not fit.

Mark Peacock at TBS GB Telematic (based at Northampton General) reported both cases but wasn't able to clearly explain what the exact mismatch is, he has promised to take pictures and send them to me. However, he is going on leave until the end of the month, so it may take a while to resolve.

Atom Sensor - R-22VA - 0110039

Issue ID #115518

Date Created 02/Mar/2018

Issued To: Steve Nixon

Completed Status: 07 Mar 2018

Notes:

Added by Ryan Swaine sent to Steve Nixon

INFORMATION ONLY ISSUE DO NOT ADD NOTES!

FYI

I have quoted a German Transport Incubator company that uses the Atom incubator, for the R-22VA.

Unfortunately they came back to me with the information that they are currently buying from IT Gambert for somewhere close to €20.

At the moment we don't have any Teledyne T-7 oxygen sensors. I'll try and speed up the delivery, but it doesn't look like stock will be shipped to us until the 11th May.

Can you please review the current back orders and see if anyone wishes to have the Viamed version instead: 0110058 T-7V. We will then adjust the production of T-7V sensors accordingly.

Comparing Lost Customers of 2 products

Issue ID #116023

Date Created 12/Mar/2018

Issued To: Derek Lamb

Completed Status: 19 Mar 2018

Notes:

Added by Catrin Hird sent to Derek Lamb

I'm sure it has been done before on something but I'm wanting to compare customers between R-48V and MAX-3.

I have done a lost customers for MAX-3 and R-48V trying to convert them to R-48V Viamed version but I want to see if any have purchased.

If that makes sense?

12 Mar 2018 Catrin Hird

0110048

0110403

12 Mar 2018 Derek Lamb

think it might be a manual job, not sure ive done anything quite like this

12 Mar 2018 Catrin Hird

I believe you may have done something with a superseded product? Can't think off the top of my head though. Not ringing any bells?

16 Mar 2018 Catrin Hird It works when there has been superseded products. This is not the case with this one but would like to be able to see sales of both products against accounts so can determine if they have stopped using on and buying the other.

19 Mar 2018 Derek Lamb

working prototype implemented
via normal lost customer routine

19 Mar 2018 Catrin Hird

Works great, thanks

Cross Reference Alternative Compatible

Issue ID #92565

Date Created 10/Apr/2017

Issued To: Derek Lamb

Completed Status: 21 Aug 2017

Notes:

Added by Catrin Hird sent to Derek Lamb

I can see that the cross reference has been updated to show alternative sensors which are compatible but it does not work the way in which I would use to highlight alternatives.

For example, if I put in R-36MED it just brings up R-36 but I believe it is also compatible to the R-49V, should we show this as well to make it easy for the office to highlight available sensors?

Sorry if we have discussed this previously.

VIAMED Sales And Marketing - Sales Viamed Medical Export
GCC Tenders in Saudi for Oxygen Sensors & Flowsensors

Issue ID #115100

Date Created 23/Feb/2018

Issued To: Steve Nixon

Completed Status: 05 Apr 2018

Notes:

Copy Issue Main Issue #115097

Added by Ryan Swaine sent to Derek Lamb

Requesting Directors feedback on how to proceed:

Jamjoom have asked us if we would like to enter the GCC tenders. We are already involved in this with our Flowsensor Apc (4310002), but it is currently registered with the GCC as a Jamjoom product, this would not be possible for any future items or when the current registration expires.

GCC Tender sales of Flowsensors Apc:

2015: 600 packs = \$38k

2016: 0

2017: 1050 packs = \$56k

2018: 300 packs sold = \$16k, 600 on back order = \$32k

Future items listed that we can bid on are as follows (still searching for other items in the tender to add):

Sensor OOM204 for Fabian - R-47V (0110047)

Estimated Purchase qty./year = 9000 = \$621k

Purchased on last tender/year = 1013 = \$70k

Oxygen Sensor for Draeger Babylog 8000 Plus - R-223V (0110023)

Estimated Purchase qty./year = 8524 = \$373k

Purchased on last tender/year = 1011 = \$44k

There is also an opportunity with the Draeger Neonatal flowsensor insert, as BP are developing one

Estimated Purchase qty./year = 12310

Purchased on last tender/year = 6136

If we were to win the tender with the 2x oxygen sensors, working conservatively on the years last tender figures, the business would be approximately \$114k at our current pricing.

Tender requirements and costs:

The cost to register in order to bid on the GCC tenders costs \$25k-\$30k. Included in the cost would be a factory visit from members of the GCC, this would have to be conducted at Envitec and BP. Steve has already discussed this with them and I believe it is possible.

The registration lasts for a period of 5 years, the tenders are for 1 year.

Jamjoom will not cover the costs, as they have had their fingers burnt in the past during the factory inspection at one of their suppliers. It was clear that the manufacturing was not done there and it was an embarrassing issue for Jamjoom. However, I am fairly confident that we can convince them to contribute, but it may make it easier if we can have one of them visit Envitec and BP for an initial inspection in order to gain their confidence that it is a true manufacturing facility.

There may be a way of getting our money back, with profits, in the first year. Unfortunately, this would be

reliant on us winning the tender:

1) We split the costs with Jamjoom, so our initial outlay would be \$15k each

2) Draeger are currently supplying the Babylog sensor for \$150, we can bid at \$100 in order to win the tender, this will allow us to temporarily raise the cost of the sensor to Jamjoom by \$15 to \$58.75, which will recoup our initial costs within the first year (1000 sensors).

Q) I understand that there is a large outlay with a certain amount of risk. Please can you review this and let me know if you think I should persue it or if you have any questions or suggestions?

23 Feb 2018 Steve Nixon

Have you submitted the prototype Babylog insert for evaluation?

23 Feb 2018 Steve Nixon

I thought that previously you said that they were asking for R-23V discounts?

What has been recently quoted to Jamjoom for the R-23V in terms of GCC contracts etc.?

23 Feb 2018 Steve Nixon

As discussed with you and Derek, in principle I think we should go for it. We have a strong hand in offering the flow sensors and both the Draeger and Accutronic oxygen sensors.

23 Feb 2018 Steve Nixon

Declaration of Conformity attached.

Missing Declarations of Conformity Oxygen Sensors

Issue ID #119981

Date Created 10/May/2018

Issued To: Derek Lamb

Completed Status: Still Outstanding

Notes:

Copy Issue Main Issue #119980

Added by Catrin Hird sent to Steve Nixon

I have done a review of the declarations of conformity, which we have, and the following are missing, please can you generate:

0110018 R-17V

0110019 R-17Vi

0110039 R-22VA

0110073 R-22VA (pair)

0110020 R-22Vi

0110072 R-22Vi (pair)

0110025 R-23Vi

The following were also missing but I have requested these from the manufacturers:

0110423 MAX-27

0110461 MAX-7L

0110452 MAX-550E

5620001 504877

0110560 OOM111

0110660 OOI103

0110524 KE-25 unterminated

0110525 KE-25 with connector

0110529 KE-25F1

0110534 KE-25F3

VIAMED Sales And Marketing - GHX Web Pricing

Missing images in Export Data

Issue ID #76990

Date Created 16/Aug/2016

Issued To: Derek Lamb

Completed Status: 31 Jan 2018

Notes:

Added by Steve Hardaker sent to Catrin Hird

I noticed when exporting the GHX stock group, there are quite a few missing images that appear in the website but not in the stock group exported data.

If you select the groups and use the Check the Images function (which is now working, yay!), you will see what I mean: there are quite a lot of the new O2 sensors missing, some SpO2 sensors, most of the Posey range, resuscitation accessories and various others.

Please can you take a look and see which ones can be updated? Thanks.

16 Aug 2016 Catrin Hird

Next Action Changed From Catrin Hird To Derek Lamb The images are selected as primary images on the website, it must still be an issue with Derek that its not pulling the information out correctly.

I've changed user to DL to see if he can look into it.

01 Feb 2017 Derek Lamb

Next Action Changed From Derek Lamb To Catrin Hird need an example one that you know is there but not in the list

01 Feb 2017 Steve Hardaker

Next Action Changed From Catrin Hird To Derek Lamb Try these, which all have images on the website:

0310304 - mobile radiant warmer.

0110431 - MAX-250A oxygen sensor

0110021 - R-22MEDV oxygen sensor

2810025 disposable oxygen hood (and most of the range with numbers up to 2310081.

27 Sep 2017 Pro-Active Marketing Report – Fourth Quarter 2017

Notes:

Added by Katie Evans sent to Derek Lamb
Derek,

As discussed, here is the current info I have regarding lost customers. The office have done as much as they can but they need more letter templates to cover more products. SN currently has 4 templates to sign off. I have shown Sarah and Zoey how to edit templates to include their name/signature but am happy to help if anyone gets stuck. I'll complete the Pro-Active Marketing Report - Third Quarter as there are only 3 days left. I will forward the issue to you so you can decide how to proceed. I have attached a template of the report for the next person to work from

Lost Customers - Consumables every 6 months

October - Posey wraps 0021013

November - T-7 0110057

November - R-17MED 0110017

November - disposable oxygen hoods with AX/MX300

December - R-24MED 0110024

December - R-43V 0110043

December - R-30V - 0110040

January - MAX-250E 0110429

February - R-17A-LV 0110107

March - EyeMax 1114005-7

Lost Customers - Non-consumables every 12 months

June - DB3 2510000

July - VM2105 0012105

August - V1000 1410000

August - VM2101 0012101

AX/MX300-I - template with SN

VM-2500 - template with SN

VersaStream - template with SN

VIAMED Sales And Marketing - Leaflets
Oxygen monitoring booklet corrections

Issue ID #108836

Date Created 23/Nov/2017

Issued To: Catrin Hird

Completed Status: 18 Dec 2017

Notes:

Added by Steve Hardaker sent to Catrin Hird

You may have a note on these already but I found a couple of discrepancies that need to be corrected for the next revision of the O2 booklet.

I think SN brought these down from 15 months to 12 due to the high temperature applications potentially shortening the lifespan:

0110019 - R-17Vi - Stock page 12 months, booklet 15 months.

0110072 - R-22Vi - Stock page 12 months, booklet 15 months.

24 Nov 2017 Catrin Hird

Thank you, I have to remove 0110071 from the booklet too. It is in progress but waiting to see if SN adding any more. Will review on Monday and see what stocks are like of the printed booklet (think we have loads). We have the get out clause on the back of spec subject to change to we can just say since the date of printing warranty has changed :)

18 Dec 2017 Catrin Hird

Loads in stock of the catalogue so will speak to SN in the new year about any more amends and reprint when required. Thanks

VIAMED Management Meeting - Other
Oxygen sensor casing colour change notes

Issue ID #101304

Date Created 22/Aug/2017

Issued To: Derek Lamb

Completed Status: 21 Oct 2017

Notes:

Added by Steve Nixon sent to Derek Lamb

Having a different sensor casing benefits both Viamed and Envitec.

Currently in certain applications and geographical markets we have sales exclusivity, whereas with Envitec we don't. At the moment, in terms of basic performance we also have the benefits associated with the sensor design.

So, if we essentially sell the same product we could risk losing our existing markets by being undercut, either by Envitec or Envitec's distributors. This also drives the price down, which is not good for either company.

If the sensors are the same, Viamed could affect Envitec's existing markets.

Envitec is a good company. However, for whatever reasons there are certain customers or areas where they do not want or will not use Envitec products.

By having a different design, we have more freedom and flexibility to implement improvements. It also makes it easier for us to continue supplying to our existing OEMs, and we can gain further OEM customers.

If a different design and/or colour is implemented then the sensors are more readily differentiated, this helps prevent sensors being used in the wrong areas and also allows differential pricing due to demands of the markets and standards. There are also standards and risk analysis benefits.

A new design altogether is preferable. However, the easiest route is to change the colour so that the sensor instantly looks different. If the colour is more solid, it also makes the easily identifiable PCB less obvious.

A sensor can be changed by casing design, casing colour, labelling colour, packaging.

In an ideal world, we should differentiate between our different markets: Medical, Automotive, Industrial, Diving (surface applications), Diving (underwater applications).

Oxygen sensor review OOM103

Issue ID #81748

Date Created 17/Oct/2016

Issued To: Derek Lamb

Completed Status: 25 Jan 2018

Linked Files

01 Nov 2016 Sample Layout Position

Notes:

Added by Steve Nixon sent to Derek Lamb

We need to crack the problem once and for all regarding R-22MED sensors being used in the Draeger Isolettes. We have gone down the line of matched (mV) pairs, but I don't believe this is the main criterion. We now know that the sensors are exposed to high temperatures during use and standby, so we can increase the sensor life by creating a new sensor derived from an Envitec OOM102. This has an output of 9-14mV, <12s, >1M hrs. The extra life is due to the use of a thicker membrane; the downside (or perceived downside) is the slower response (this may be an advantage). The thicker membrane will also slow down evaporation of the electrolyte, which would cause problems in terms of life, offset, reliability...

If this does not fully work we can always use a higher temperature compensation board, but I believe that this should resolve the problem. It looks like Envitec have now realised this, as they have just updated their web site cross ref.

Existing sensor 0110021

OOM103 9-13mV, <5s, 500K hrs.

New sensor based on:

OOM102 9-14mV, <12s, >1Mhrs

We will have two new parts numbers, for single and dual pack. New part numbers will simplify review of whether we have resolved the problem and also aid in targeting customers in the future.

Any comments before we go ahead?

I have 10 sample sensors if anyone wishes to submit for technical assessment and suitability with a co-operative customer.

NOTE: Please keep technical design rationale `in-house` and confidential.

Oxygen sensor review OOM201 & OOM104

Issue ID #81757

Date Created 17/Oct/2016

Issued To: Derek Lamb

Completed Status: 25 Jan 2018

Notes:

Added by Steve Nixon sent to Derek Lamb

From the statistics it doesn't look as though we have a real problem with our existing R-23V sensor, although we have had a number of sensors returned due to bubbles. This could be caused by sensors being exposed to elevated temperatures, for example in an incubator and this would cause evaporation of the electrolyte.

It has always concerned me why Envitec have had two versions of the Draeger 6850645 and Maxtec have led or followed suit with two sensors. NOTE: Draeger just have one version.

OOM210 (0110023 R-23V) 14-20.7mV, <12s, >500K life NOTE: dual cathode.

OOM104 14-20.0mV, <12s, >500K life NOTE: single cathode.

MAX-11 14-20.0mV, <12s, >500K life NOTE: dual cathode.

MAX-11i (incubators 8000, high temp app) 14-20.0mV, <12s, >500K life NOTE: single cathode.

The question is did the original TAI version and does current Draeger version suffer from problems, and are they evident to customers? If possible we need to obtain new working samples of the Draeger 6850645 sensor.

I will go ahead and create a new sensor based on the OOM104. This will be specifically for use in the I8000 and will offer greater life due to being a single cathode design. Due to the higher output we don't have much scope in using a thicker membrane and also the response time is already relative slow.

Any comments before we go ahead and implement?

I know Envitec/Maxtec seem to have already reached the same conclusion in advance, but this is historic - so perhaps not many people are aware of the reasons behind the design specifications. Therefore please keep technical design rationale `in-house` and confidential.

Next Action Changed From To Steve Nixon
Priority Changed From 5 To 0 Photos for:
0110018
0110019
0110020/72
0110025

Have been added to Intrastats Stock photo pages. I believe you need these for the spec sheets.

I am just awaiting the R-22VA (0110039/0110073).

07 Sep 2017 Steve Nixon

Priority Changed From 5 To 1 Thanks. The R-22VA is still going through field trial and awaiting sensors with production version cap.

23 Jan 2018 Steve Nixon

Next Action Changed From Steve Nixon To Catrin Hird Please see the attached which lists the required images for the Viamed/Envitec oxygen sensors.

Either we don't have any images or the labelling has been updated, see notes in red text.

I need the images for the data sheets. Artwork for leaflets, catalogues and the web site also needs updating.

25 Jan 2018 Catrin Hird
Requested stock from JC via Skype

25 Jan 2018 Catrin Hird
Created Related Issue #113087
Added by Catrin Hird sent to Jonathan Connor
Please can I have a sample of each of these when they come into stock for photography.

Thanks

25 Jan 2018 Steve Nixon

If you look at the stock screen it looks like 0110039 were added to stock on the 18th (last week). Also looks like you already have one, is it the latest version or an older one?

As discussed, intrastats allows you to have alerts when stock has arrived.

26 Jan 2018 Catrin Hird

We have no stock of 0110014 or 0110040 to take photos yet. I will ask JC to provide me samples when they arrive into stock.

Due to the cost implications and the effect on ISO we have been unable to take pictures at this time, due to the product being in a blister pack and unable to be repackaged for sale. We will take pictures over the next 12 months when we receive them in for disposal or warranty replacement.

0110042 pictures have been taken and added to stock file.

05 Feb 2018 Catrin Hird

POR11453 - R-22Vi sensors to book in urgently

Issue ID #106561

Date Created 26/Oct/2017

Issued To: Catherine Spence

Completed Status: 27 Oct 2017

Notes:

Copy Issue Main Issue #106560

Added by Steve Hardaker sent to Jonathan Connor

Steve advised that he is upgrading POR11453 for 200 x 0110020 - R-22Vi sensors to Express Saver to get them in earlier on Monday 30/10/17, with the intention of getting an urgent customer order out the same day if possible.

The order is for 4x 0110072 matched pairs on ORD88949 for Huddersfield Royal, which you have advised you will bump up to Priority 1.

Please can these sensors be booked in as soon as they land, thanks.

VIAMED Stock Meeting - Purchase Back Orders Review

POR11453 - R-22Vi sensors to book in urgently

Issue ID #106560

Date Created 26/Oct/2017

Issued To: Jonathan Connor

Completed Status: 06 Nov 2017

Notes:

Added by Steve Hardaker sent to Jonathan Connor

Steve advised that he is upgrading POR11453 for 200 x 0110020 - R-22Vi sensors to Express Saver to get them in earlier on Monday 30/10/17, with the intention of getting an urgent customer order out the same day if possible.

The order is for 4x 0110072 matched pairs on ORD88949 for Huddersfield Royal, which you have advised you will bump up to Priority 1.

Please can these sensors be booked in as soon as they land, thanks.

Added by Steve Hardaker sent to Sarah Walton

Just in case you have not already be advised, Ryan informed me today that Dameca have decided not to take the 250 R-17V sensors that he offered in place of R-17MED.

As such, pn 0110018 R-17V can be offered to UK customers who do not want to wait for the Teledyne R-17MED to come into stock.

Just to be clear; it's the same price and the R-17V will work wherever an R-17MED is used. The difference is that the R-17V is manufactured by Viamed, the R-17MED by Teledyne.

R-22MEDV matched pair problems

Issue ID #55275

Date Created 23/Dec/2014

Issued To: Steve Nixon

Completed Status: 09 Aug 2017

Linked Files

11 Jan 2017 R-22Vi Initial Testing v1.0 20170111

Notes:

<div style='color:#000000'>Added by Steve Hardaker sent to Jonathan Connor

Please can you provide Steve Nixon with a report on the sensors on SRS64651. They are a pair of R-22MEDV sold as a 0110071 matched pair. We may have a potential problem with the matched pairs not tacking together.

They came from Airedale Hospital, who reported that they initially calibrated but within a week failed to calibrate despite repeated attempts. He brought them in and I tested them and found them both to be within spec individually but a full mV apart.

The original specs are not on the QA pages of Intrastats so please can you locate that data, then compare to the current test readings and forward the info to Steve N, who wants to take them to Bluepoint. Thanks.

23 Dec 2014 Steve Hardaker

Created Related Issue #55276

Added by Steve Hardaker sent to Jonathan Connor

Please can you update the following 2 SRS entries, which relate to 0110071 R-22MEDV matched pairs from Airedale Hospital.

- SRS64651 - rec yesterday (see linked issue), put in Goods In but not yet booked in.
- SRS64347 - SN recalls that these were brought in by Gary Hird in person around 4/6/14 when I was on leave.

Steve N was looking at the returns figures but realised that the one from June isn't showing up on the repair stats . Thanks.

31 Dec 2014 Jonathan Connor

SRS64651.(V03163) 11.2 and (V03164) 11.5 were the original outputs, (V03163)has dropped by 0.5 and (V03164)has gone up by 0.3

26 Feb 2015 Jonathan Connor

Will keep an eye on Matched pair returns, but at the moment the ones we have had are still within spec, just they have drifted in opposite directions. Steve has taken a pair to Envitec with him but we cannot return the others as they are not faulty in their eyes

30 Apr 2015 Steve Hardaker

Next Action Changed From Jonathan Connor To Steve NixonI have found a copy of the Service Manual for the C2000, it states the following for the error message Oxygen Cell Difference:

This alarm occurs when the oxygen cell readings differ by more than 3. As a result, the oxygen flow into the system is interrupted.

For a typical air value, 10mv \pm 10.3mV, meaning a differential of 3mV will cause the error, which is why we initially set it to \pm 2mV.

However, I now think that the off-set plays a key part as it will change the gradient of the output slope as the sensor is exposed to higher O2 levels.

By matching the output AND the offset, I believe that we will minimize failures. As such, you are implementing a change to our QA, please can you update this when done just for the record, then we can look towards closing it off, thanks.

01 May 2015 Steve Hardaker

For reference, 2 more hospitals have reported problems this week: Bradford Royal and Gloucester Royal. The latter reports that they have had 3 pairs fail in under 5 months.

See SRS64863 & SRS64864 respectively.</div>

02 Jul 2015 Derek Lamb

Note as of May we have a different way of matching the sensors using both the offset and the mV

26 Nov 2015 Steve HardakerI followed up with Bradford Royal and they are still seeing the problem. They reported a pair sold in July 2015, which we have matched using the new method started in May, that generate the error Oxygen Cell Different.

I have checked the QA data and they look well matched initially:

s/v V04817 - 11.445 mV, offset 40

s/n V04835 - 11.560 mV, offset 45

Added SRS65171 and asked to be updated as to the findings. Needs further investigation.

06 Jan 2016 Steve Hardaker

Bradford Royal again reporting further failures and are returning 2x R-22MEDV sold in Aug 15 (SRS65220), reporting calibration failure: s/n V04995 & V04996 F15.

I have added an issue #66133 to Jonathan to ask for Envitecs detailed report on the last pair sent back (V04817 & V04835 above) as we need to resolve this.

I think we are at the stage now where this needs a comprehensive investigation report to log all the issues and to focus on a resolution. Can I suggest this as a task for Michael

23 Feb 2016 Steve HardakerBradford Royal are returning 2 more R-22MEDV sensors that are failing to calibrate (s/n V04829 & V04830 on SRS65300).

These are from the same batch as those in notes above on 26/11/15, Envitecs test reports from those indicate a drift downwards in output and problem with the offset going out of specification:

At point of QA:

s/v V04817 - 11.445 mV, offset 40

s/n V04835 - 11.560 mV, offset 45

After less than 4 months in service:

V04817 - 10.9mV - offset 238

V04835 - 10.6mV - offset 281

The offset should be <200 so seems to be the root cause of the problem due to increasing with time in service.

This warrants a proper investigation. I have 22 test reports from Envitec containing useful data with the potential to help solve this problem, many of the offsets have gone high.

The data will need adding to a report and analysing as it is currently in printed form on separate sheets. This may be a good technical support project for Michael. Please can we discuss

05 May 2016 Steve HardakerStepping Hill reporting large numbers of failures of R-22MEDV matched pairs in Isolette 8000s, reporting 8 or 9 failures in a short period of time, prompting the user to request that they go back to original Drager sensors "whatever the expense".

They are sending 3 pairs back under warranty (SRS65408), I offered to replace with matched pairs of Teledyne R-22MED to see if this resolves the problem.

15 Jun 2016 Steve Hardaker I visited Stepping Hill EBME on 9th June to help resolve the situation, they presented me with another pair that failed prematurely under warranty. SRS65465.

They no longer want the 0110071 Viamed R-22MEDV so I advised them to order R-22MED and to specify on the order to match them when picking. I have added a memo to their account.

I looked at how they use them and this may help with the investigation:

The Isolette 8000 incubators are kept permanently on stand-by in the Neonatal Unit, which means the sensors are exposed to temperatures in the mid 30's Celsius for 24 hours a day from installation.

Typical settings may range from:

34C and 50% R.H. for a medium pre-term baby (~34 weeks)

38C and 95% R.H. for a very pre-term baby (~24 weeks).

The incubators are not left connected to oxygen supplies but may still have elevated levels of oxygen inside.

Please can you update this issue as to any progress that has been made as it is a couple of years old with no documented evidence of an investigation being in progress, thanks.

20 Jun 2016 Steve Nixon

OK, will review with Marko & Christa during the next engineering meeting.

30 Sep 2016 Steve Hardaker Bradford Royal returning 2 more pairs of sensors, failed in under 9 months, initially cal but then read `O2 cell difference`.

Again used in Isolette incubators that are kept always on when not in use.

06 Oct 2016 Steve Hardaker

Stepping Hill reporting another pair of R-22MEDVs failed after around 9 months in an Isolette 8000, which is becoming a commonly mentioned figure.

It looks like we have found the expected lifespan in an `always-on` incubator.

15 Oct 2016 Steve Nixon

Next Action Changed From Steve Nixon To Jonathan Connor I was expecting some sample sensors from Envitec, believe they will be badged as OOM102. Have we received them yet?

17 Oct 2016 Jonathan Connor

Yes they are on the on hold shelf

04 Nov 2016 Steve Hardaker Waiting on labels as we don't want to send them out with Envitec's details on. Derek has asked Catrin to knock up a For Evaluation Only label, just now waiting on DL/SN approval before putting onto the first pair of sensors for testing at Stepping Hill. See issue 81752.

23 Nov 2016 Steve Hardaker Received proofs of the labels yesterday and SN has approved them providing I do not allow them to be used on patients. Visiting Thur 24/11/16 to test on a number of incubators.

Please scan all 10 sensors to me when matched as pairs and I will take them all for testing. It will give us a good idea of how closely they need to be matched to pass calibration.

11 Jan 2017 Steve Hardaker

Next Action Changed From Jonathan Connor To Steve Nixon Steve, please see attached report: R-22Vi Initial Testing 20170109

This summarises my findings from on-site testing at Stepping Hill Hospital, combined with a historical report from 2002, which illustrates why we arrived at the R-22MEDV matched pair spec of 9.0 mV to 13.0 mV with a maximum 0.4 mV differential.

The 2002 data seems still valid and can be used to inform the spec of the R-22Vi. The next stage, in my opinion, is to test these in the intended application: either using real sensors in clinical use, or a long-term simulation using an original incubator if one can be obtained.

16 Jan 2017 Steve Hardaker

Created Related Issue #87162

Added by Steve Hardaker sent to Jonathan Connor

Please can you transfer the 10x 0110020 R-22Vi single sensors from my demo stock to Steve N as I have now finished with them.

The testing on-site at Stepping Hill went well and SN advises that we can now start supplying samples for evaluation. Please can you match up the 20 0110020 sensors into pairs (0110072). Thanks.

25 Jan 2017 Steve Hardaker

Supplied a pair of sensors to Gary Hird at Airedale for use in a C2000 Isolette against a failed pair of R-22MEDV, see SRS65794. He will date them and track their lifespan.

S/no: V100016 and V100001.

11 Apr 2017 Steve Hardaker

Borders General reported 2 matched pairs of R-22MEDV failed at exactly same time after 9 months in service.

Replaced with 2 pairs of R-22Vi under warranty on SRS65928.

Leaves 6 pairs in stock, no failures yet (4 pairs already in service at Airedale) might be time to look at ordering more.

04 May 2017 Steve Nixon

As discussed, believe may be resolved with the introduction of the R-22Vi sensors. Need to review after these sensors have been in the market for 12-18 months.

04 May 2017 Steve Hardaker I believe that we have done everything we can at this stage. Rather than keep this issue live for 12 months, I have generated a recurring scheduled issue for myself to follow up with customers, starting 1 year on from the first ones being put into the field.

There are 240 single sensors on order and I will continue to roll them out to customers that are having problems. I think we can close this particular issue off and I will add further feedback to Intrastats as I get it.

Notes:

Added by Steve Hardaker sent to Steve Nixon

Paul Derman at Southmead Hospital has sent a non-conformance report concerning the R-30V oxygen sensor (see attached).

They have some R-30V oxygen sensors that are allowing gas to leaking through the sensor internally. He has opened a few up and found that the design has changed:

Early sensors, eg s/n V103005 (2015-12) have a large sensor inside that takes up the whole of the blue sensor housing.

A later sensor that is leaking gas, s/n V103330 (2016-07), has a narrower diameter sensor inside that can move within the housing, breaking the integrity of the seal with the front O-ring that seals around the sensing membrane, and the back O-ring that seals around the electrical connector, allowing gas to flow through.

A yet later version, s/n 103760 (2017-06), also uses the narrower sensor but has a thick O-ring to centralise the internal sensor inside the housing and prevent gas from leaking through.

He will return a number of sensors for investigation on SRS66190, including V103329, which is the next number on from V103330 that was found to have an O-ring missing. V103329 is unopened so that we can see for ourselves whether the O-ring is present. This may help to show whether this was a design error that was later fixed with the inclusion of the thick O-ring or whether the O-ring in V103330 was simply missed out during manufacturing.

Please can you investigate with Envitec as discussed.

15 Sep 2017 Steve Hardaker They reported a further sensor leaking gas: s/n V103325 dated 2016-07 from the same batch of 8 supplied on 20/9/17.

Advised him of the full list of serial numbers that they have received from that batch and said that we will

replace any and/or all of the ones that he wants to return from that batch as per DL.

Emails printed to PDF and linked for reference.

15 Sep 2017 Steve Hardaker

Steve, I have forwarded you the email from Paul Derman and I have replied as best I can but we have no results to offer as yet.

Please note that I have not been able to directly answer the question in his email "Please can you give me assurances that the sensors that we will order have ordered since as safe to use.";

Please can you speak to Envitec ASAP and advise him accordingly? Thanks.

18 Sep 2017 Steve Hardaker

These have come back in according to the customer: "delivered by Priority Express Couriers Ltd on 11-Sep-2017 at 11:01.The delivery was signed for by CONNER";.

Please can you have someone look at them asap and advise Paul whether his replacements may or may not have the same problem, thanks.

19 Sep 2017 Steve Nixon

email to Envitec, 8th September

Hi Jessica

The following is further to our discussion yesterday concerning R-30V oxygen sensors.

A non-conformance report has been submitted by Southend Hospital (see attached). They have some R-30V oxygen sensors that are allowing gas to leak through the sensor internally. The hospital engineer has opened a few up and found that the design has changed:

Early sensors, eg s/n V103005 (2015-12) have a large sensor inside that takes up the whole of the blue sensor housing.

A later sensor that is leaking gas, s/n V103330 (2016-07), has a narrower diameter sensor inside that can move within the housing, breaking the integrity of the seal with the front O-ring that seals around the sensing membrane, and the back O-ring that seals around the electrical connector, allowing gas to flow through.

A yet later version, s/n 103760 (2017-06), also uses the narrower sensor but has a thick O-ring to centralize the internal sensor inside the housing and prevent gas from leaking through.

The engineer will return a number of sensors for investigation, one will be unopened, so that we can see for ourselves whether the O-ring is present. This may help to show whether this was a design error that was later fixed with the inclusion of the thick O-ring or whether the O-ring in one or more sensors has been simply missed out during manufacturing.

--

Steve

19 Sep 2017 Steve Nixon

email from Envitec, 11th September

Dear Steve,

please send us as soon as possible the sensors back under RMA 17/1029 for further investigations. Also please send us the cut part as well.

Jessica

19 Sep 2017 Steve Nixon

email to Envitec 18th September

Jessica

The customer has found another gas leaking sensor, I'm concerned about his assurance request, we need to get back to him regarding this.

Hi Steve,

We have just found another O2 sensor which is leaking from the electrical connector. S/No. V103325. This is part of the same batch as the previous two returned sensors.

How would you like me to proceed.

​​

Please can you give me assurances that the sensors that we will order have ordered since as safe to use.

Many thanks,

Paul.

Anaesthetic Service Head MDSO

19 Sep 2017 Steve Nixon
email from Envitec, 18th September

Hi Steve,

Did you send the sensors back already?

Jessica

Kind regards / Mit freundlichen Gruessen

19 Sep 2017 Steve Nixon
email to Envitec

Hi Jessica

You should receive the sensors on Thursday, we will send examples of:

- a) Oldest version - Wide body inner sensor, no O ring needed.
- b) Narrow body inner sensor, O ring missing (production error) or omitted from the design?
- c) Latest version - Narrow body inner sensor with O ring.

In the case of b) above, gas leaks through the sensors so we need to identify the risk and if possible narrow it down to affected serial numbers and/or batches as soon as possible.

Steve

19 Sep 2017 Steve Nixon

Hi Jessica

Regarding the R-30V issue, from the information provided by the customer, the problem could be related to just the batch supplied on POR10798; or potentially across the following list of batches. Once we receive feedback from you we can quickly identify every affected customer:

19 Sep 2017 Steve Nixon
See attached list of sales relating to purchase order POR10798

19 Sep 2017 Steve Nixon
See attached list of potential related batches of R-30V sensors.

02 Oct 2017 Steve Nixon

Next Action Changed From Steve Nixon To Derek Lamb See attached report received from Envitec.

Summary:

20.11.2015 Implementation of product change to inner standard cell to improve product quality, life time and lead time. Sensor passed CE-Cert and free-fall testing.

From feedback, corrective and preventative action taken to stabilise the position of the inner cell with an O ring. This is to counter occurrences of leakages after mechanical shock or fall. In accordance with testing and product monitoring, no leakage has been observed since the implementation (12.07.16) of CAPA.

A risk of the installed base in use was not evaluated as the equipment would detect a gas leakage during pre-use checks.

I have asked production to clearly identify the potential sensors involved:

- 1) First serial number of product change
- 2) First serial number of when CAPA applied.

06 Oct 2017 Steve Nixon
Spreadsheet with serial numbers attached.

06 Oct 2017 Steve Nixon
email sent to Envitec.

hanks Jessica

Can you please check the serial numbers of when the O ring (latest version) was fitted.

According to the spreadsheet it is from 103296, but the sensor returned and on the report without the O ring is 103330.

12 Oct 2017 Steve Nixon
See attached finalized report CR17/5169

- 1) Serial number of product change to standard (narrow diameter) cell:
103046 January 2016

2) Serial number of when all batched sensors have large O ring fitted:
V103371 September 2016

Customer paperwork and issue can be completed.

12 Oct 2017 Steve Nixon

13 Oct 2017 Steve Hardaker
Sent the attached email -

Email Out - Results of investigation CCR150 20171013

Just awaiting confirmation of receipt and whether the customer raises any other issues that require further action.

22 Nov 2017 Derek Lamb
Closed CCR150

23 Nov 2017 Steve Hardaker

I have spoken to Paul Derman, who has received the report and he is satisfied with the findings. I asked him to confirm in writing for our records, see attached email.

Can now be fully closed.

23 Nov 2017 Derek Lamb
ok thanks

Issued To: Michael Green

Completed Status: Still Outstanding

Linked Files

16 Apr 2018 R-43V Sample Sensor Label for Evaluation

17 Apr 2018 0110043 R-43V Sensor Label SAMPLE1 2018-04-17

17 Apr 2018 0110043 R-43V Sensor Label SAMPLE2 2018-04-17

17 Apr 2018 0110043 R-43V Sensor Label SAMPLE3 2018-04-17

17 Apr 2018 0110043 R-43V Sensor Label SAMPLE4 2018-04-17

Notes:

Added by Steve Hardaker sent to Catrin Hird

We have some R-43V with a platinum cathode that we want to send to customers to test, however, as these are untried, we need to label them as Not For Clinical Use.

Can we discuss with SN next week as we may need to redesign the label or make a small over-label, but space is very limited.

16 Apr 2018 Catrin Hird

Oxygen Sensor labels are designed by Envitec but we have done this before for R-22Vi and JC/Derek can print the labels.

Would need the Serial Number if we have it otherwise we can use the attached artwork to print with SN as Sample.

I believe this is the old layout though. SN may have the original file from Envitec that I can doctor and print in-house.

17 Apr 2018 Steve Hardaker Serial numbers are: Sample1, Sample2, Sample3, Sample4.

17 Apr 2018 Catrin Hird

Next Action Changed From Catrin Hird To Derek Lamb Derek, please can you print the attached labels for SJH to show to SN.

0110043 R-43V Sensor Label SAMPLE1 2018-04-17

Issued To: Steve Nixon

Completed Status: Still Outstanding

Notes:

Added by Michael Green sent to Derek Lamb

Service Repair Sheet:64807 SRN25611 Oxygen Sensor 0110023 V012289 Oxygen Sensor R-23V.

16 Nov 2017 Derek Lamb

Next Action Changed From Derek Lamb To Steve Nixon Steve,

do we have an outcome for this repair, its stuck in the system

07 Dec 2017 Steve Nixon

Sorry, not sure how this one got stuck like this. Suggest we get a current original from sensors for disposal service and compare against current R-23V. I will ask JC to see if we have a sample to measure.

11 Jan 2018 Michael GreenThe sensor has been compared to a selection of R-23V Oxygen sensors from 2015, 2016 and 2017. The size of the sensor has not changed. Each is 22.1mm in height, 29.0mm in diameter at the contact end and 28.0mm at the sensor surface end.

Completed Status: 29 Oct 2017

Notes:

Added by Steve Nixon sent to Steve Hardaker
Sales lead received from Envitec:

Hi, We have urgent need for a matched pairs of type OOM102 fuel cells. Have you these in stock?
Please provide the part number and cost.

Thanks,
Martin Campbell
Senior Med Tech Eng
Calderdale Royal Hospital

Name: Herr Martin Campbell
E-Mail: Martin.Campbell@cht.nhs.uk
Firma: Calderdale & Huddersfield NHS Trust
Land: UK
Telefon: 01422 222536

Best regards,
Your EnviteC team

23 Oct 2017 Steve Nixon
OOM102 = R22MEDVi

Do you know Martin Campbell?

Could be a delicate situation, curious as to why they contacted Envitec?

A/C 0000240 have purchased 0110071 & latterly 0110072

A/C 0002250 have purchased 0110071

25 Oct 2017 Steve Hardaker
They placed an order for 4 pairs of 0110072 R-22Vi on 20th Oct but we we (and still are) out of stock.

I can't see who in the office dealt with it but we will have advised the customer of stock shortage, which has lead to them try to source sensors from Envitec.

The original order for 4 pairs is on as a back order, see ORD88949 on acc 2250.

Not sure what to do with this until I speak to you, I assume you don't want me to tell them that the Viamed sensor is made by Envitec?

26 Oct 2017 Steve Hardaker
Spoke to Martin regarding en enquiry that he made to Envitec for pairs of OOM102. I advised that Envitec referred it to us as we also supply Envitec sensors but the best ones for the job are 0110072 matched pairs of R-22Vi, which are arriving with us on Monday.

He is OK to wait but still needs them urgently, advised that we can match up some R-22MEDV if they are desperate but these were known to not last as long, which is a problem he has experienced so he would prefer the R-22Vi.

Added issue to JC to get these booked in as a priority and bump the customer order up to Priority 1.

Issue ID #113612

Date Created 01/Feb/2018

Issued To: Willow Merryweather

Completed Status: 01 Feb 2018

Notes:

Copy Issue Main Issue #113608

Added by Steve Hardaker sent to Sarah Walton

Billy Hogg at Borders General is placing an order for 4x 0110072 - Matched pairs of R-22Vi.

He is returning 3 pairs under warranty and purchasing 1 pair.

Procedure normally states that when replacing in advance, we would ship goods as chargeable and credit the sensors when they return them, but in this case that makes the difference between him ordering today and getting the sensors tomorrow, or getting this signed off by Procurement which means they don't get the sensors until Monday.

This leaves the Special Care Baby Unit 4 incubators down over the weekend, which could have serious consequences, so I have agreed to make an exception by shipping FOC and I will take responsibility for retrieving the sensors in issue 113607.

Please process as priority 1 and ship today. Please see HL to sign off.

Next Action Changed From Kate Griffiths To Suzanne BrownI emailed as below and have had no reply as yet:

Dear Salman,

Thank you for your enquiry.

Our compatible sensor for the Dräger Evita 4 and Evita XL is the R-23V, part number 0110023.

We offer multiple discounts which I show below:

1 = £40.002 = £36.003 = £34.0011 = £32.00

Unfortunately, we are not able to supply you with the Hamilton Galileo expiratory valves as we do not stock them.
