This server could not prove that it is **192.168.1.2**; its security certificate is from **www.vmsecure.me.uk**. This may be caused by a misconfiguration or an attacker intercepting your connection.

[Proceed to 192.168.1.2 \(unsafe\)](#)

You should be taken to the Intrastats login page  
you can ignore the warning

⚠ Not secure | <https://192.168.1.2/login.php>

as the encryption certificate is checking for the [www.vmsecure.me.uk/login.php](https://www.vmsecure.me.uk/login.php) address.
