**Update regarding Viamed branded oxygen sensors - 2019-03-29**

Issue ID #141361

Date Created 29/Mar/2019

Issued To: Derek Lamb

Completed Status: Still Outstanding

**Notes:**

Added by Steve Nixon sent to Derek Lamb

Last week we were advised that the Viamed CE certification for our oxygen sensors manufactured by Envitec is no longer valid.

In response to this the sensors will now be labelled and covered by certification issued by CE 0123 (TÜV SÜD) instead of CE 0086 (British Standards Institute). The sensor deliveries will not be affected.

In addition, the sensors will be labelled with the 'factory' symbol followed by the text: Envitec-Wismar GmbH, this is to clearly show that the sensors are manufactured by Envitec. The sensors will still be Viamed branded and labelled with our contact details. The sensors will state of part numbers (REF) and model numbers.

The sensors covered are as follows and the new labelling will start to be applied by the factory as of today.

0110014 Oxygen sensor R-15V  
0110018 Oxygen sensor R-17V  
0110019 Oxygen sensor R-17Vi  
0110020 Oxygen sensor R-22Vi  
0110021 Oxygen sensor R-22MEDV  
0110023 Oxygen sensor R-23V  
0110025 Oxygen sensor R-23Vi  
0110039 Oxygen sensor R-22VA  
0110040 Oxygen sensor R-30V  
0110041 Oxygen sensor R-41V  
0110042 Oxygen sensor R-42V

0110073 Oxygen sensor R-22VA. Pack of 2  
0110075 Oxygen sensor R-75V

Contracts and associated paperwork with Envitec are being edited and processed.

The Envitec CE certificate will now cover the sensors that will be delivered from today. The certificate will be linked to the stock pages next week.

The CE Declaration of Conformity will be replaced next week and again will be linked to the stock.

The datasheets are still valid, but will be updated and also revised in due course.

Next week I will prepare a document illustrating the new labelling. Eventually the labelling artwork will be incorporated as part of each sensor datasheet.

Sensor images on literature and the web site have been/will be edited or updated by Catrin.

New sensor images will be taken in due course.
