VIAMED Management Meeting - Other

2510000 DB3 IP rating

Issue ID #108578

Date Created 20/Nov/2017

Issued To: John Lamb

Completed Status: 24 Aug 2018

Notes:

Added by Steve Nixon sent to John Lamb

As discussed I believe should at least be IP3X, IP30 or IP31 (if supported by testing).

NOTE: IEC 60601 states:

7.2.9 IP classification ME EQUIPMENT or its parts shall be marked with a symbol, using the letters IP followed by the designations described in IEC 60529, according to the classification in 6.3 (see Table D.3, Code 2). ME EQUIPMENT classified IPX0 or IP0X need not be marked as such.

See IP rating chart below (IEC 60601).

I believe that I could `in-house` certify against foreign objects.

If it is as follows, then when the Microstim is mounted in an upright position the casing moulding protects the switches.

dripping water (vertically falling drops) shall have no harmful effect on the specimen when mounted in an upright position onto a turntable and rotated at 1 RPM.

Do we need to offer an explanation if we give a rating?

Does a third party have to qualify the rating?

We can argue against a sealed membrane switch. Functionality wise, the mechanical switches have a lower operational risk and they are well proven over a long period of time with extremely low failure rate (0.06%) and no complaints. Membrane switches are not as reliable and have operational risks.

4809 units sold (current DB3 version), incidence of liquid ingress 3 in circa 13 years = 0.0046 per year.

IP ratings:

IEC 60529

The digits indicate conformity with the conditions summarized in the tables below. The digit 0 is used where no protection is provided. The digit is replaced with the letter X when insufficient data has been gathered to assign a protection level.

N1 = 0 Non-protected

1 Protected against solid foreign objects of 50 mm ∅ and greater

2 Protected against solid foreign objects of 12,5 mm ∅ and greater

3 Protected against solid foreign objects of 2,5 mm ∅ and greater

4 Protected against solid foreign objects of 1,0 mm ∅ and greater

5 Dust-protected

6 Dust-tight

N2 = 0 Non-protected

1 Protection against vertically falling water drops

2 Protection against vertically falling water drops when ENCLOSURE tilted up to 15 °

3 Protected against spraying water

4 Protected against splashing water

5 Protected against water jets

6 Protected against powerful water jets

7 Protected against the effects of temporary immersion in water 8 Protected against the effects of continuous immersion in water NOTE When a characteristic numeral is not required to be specified, it is replaced by the letter "X" ("XX" if both numerals are omitted).

15 Jun 2018 John Lamb

WE do not need 3rd party checks but have to be correct in how we test , who tested, qualifications of tester, and results. I would suggest a short video be included in the test results.

The switch and water is a possible hazard. your explanation is a good one. We need to add it to the Technical files in E6 and E3

You could claim IP00 and justify that the Microstim is designed to be used in dry conditions.

We send 2520002 stock to Unimed and they convert to pinch clamp version 2520003.

May not need to order any at the moment. Stock is showing as 74 saved for Asil ORD92596.

Not sure why saved as this, since there are no such cables on the Asil order and it would be a most unusual quantity to order. Asil also haven't ordered any DB3 units.

13 Jul 2018 Catherine Spence
no they need to be moved off asil shelf, human error. I will correct this

13 Jul 2018 Steve Nixon
OK, so in effect we have 74 extra cables.

19 Jul 2018 Catherine Spence
this has been corrected, now not showing as saved for asil

VIAMED Stock Meeting - Purchase Order Requirements

2530012 Microstim control knobs required

Issue ID #145648

Date Created 22/May/2019

Issued To: Steve Nixon

Completed Status: Still Outstanding

Notes:

Added by Steve Hardaker sent to Steve Nixon

As we discussed, in order to support the Microstim DB3 for 7 years, we are going to need a good amount of 2530012 Microstim control knobs.

The 2019 current year estimate for sales of the knob is 248/year, up from an average of 180 per year for previous 2 years. Repair stats also show an additional 84 returns with problems related to the knob.

Realistically, we are going to need another 1500 or so on top of the 322 currently in stock.

Can you chase up on your sale or return issues

17 Jun 2019 Ryan Swaine
Done. However, please can you help me with the following.

These two items are scanned to me, I have no idea why, as I do not have them. Please can you kill them:
8438890110023Oxygen sensor R-23VV013195
2896152510000Microstim DB3 - Supramaximal NerveH0001915

Jamjoom have the following items scanned to them. They were left with a sales rep after the Saudi Health exhibition to follow up on some leads for me, I was to collect them on my next visit. Unfortunately the market changed that year and I never made it back to collect the devices, please kill them as they will be dead now and the products are no longer available.

16 Jan 2019 Steve Nixon

I know I chased them up on Monday, 1200 coming March. Looks like that nobody had chased the P.O. log confirmations. Need to discuss with you, there should be sufficient staff.

In the meantime we can offer the longer 1.5m version, already discussed with Cathy and Robert a few weeks ago.

Suggest we give it a few months and then review if cash flow OK to order another 1200+ for stock.

VIAMED Feedback - Product Feedback Positive
Microstim DB3 airworthiness assessment

Issue ID #132631

Date Created 21/Nov/2018

Issued To: Steve Nixon

Completed Status: 26 Nov 2018

Notes:

Added by Steve Hardaker sent to Steve Nixon

Over the last 7 months, I've been working with Leidos Supply Ltd (primary equipment supplier for the MOD) and RINA Consulting (testing house) to get the Microstim DB3 through the Special Purpose Aeromedical Equipment (SPAME) airworthiness assessment.

I'm pleased to report that the airworthiness process is now complete and the device has been declared to pose no serious risk to either the aircraft or patient. They do caution that there is still some work to do, and once this is complete, I will obtain something to substantiate the accreditation for the Technical Files.

One thing that has arisen is the requirement to only use batteries that are declared safe for air use. They are happy to use their own batteries and have requested a part number for a device that ships without a battery.

Can we do this, or would you rather cover this with stock and account memos?

26 Nov 2018 Steve Hardaker

Provided part number 2510001 for a Microstim without a battery.

With regards to the standards, the customer advised the following:

“I should be able to share with you the defence standards which have been applied. I have been informed that these standards mirror civilian aviation standards but until the project is signed sealed and delivered I wouldn't want to share anything that has the slightest potential to change.”

With regards to anticipated usage:

“I don't predict annual demand to be too high. There isn't scope to add further users to the entitlement so new demands will probably come about when a device is damaged.”

Barcode count is correct. Opera seems to be out due to creating and splitting multipacks, at some point someone has forgotten to minus singles out of opera.

2530100 Microstim DB3 Tester PCB

2530104 Microstim DB3 Tester - Diode

2530105 Microstim DB3 Tester - LED

These have been received into opera once and never barcoded. I assume MG has a box of them somewhere and they have not been automatically reduced down from DB3 tester production jobs. I'll have a rummage and see what I can find.

2520001 Microstim DB3 - Patient Lead.

2520003 Microstim DB3 - Patient Lead.

Will check counts and let you know.

Just a quick update to add a No Equivalent to the oxygen sensor cross reference.

Manufacturer: Sykes-Pickavant

Model: Portable 4 Gas Analyser

Part Number: 32520000

Link to product:

<https://www.sykes-pickavant.com/products/electrical-diagnostics-and-test-tools/emissions/1807>

I have attached some images of the original sensor, its a Citicel. I can't quite make out the original part number but we clearly have no equivalent.

Next Action Changed From To Derek Lamb Please find attached sample label for the Microstim DB3 as well as the JPG for trying on the Zebra.

Ref is the Part number 2510000

SN is the serial number

ID is our barcode so we don't have to do a separate label and outline of warehouse is going to be the manufacturer date which will be different batch to batch which is shown on the inside of the DB3.

Wrong image exporting from website to GHX stock group

Issue ID #93252

Date Created 21/Apr/2017

Issued To: Catrin Hird

Completed Status: 01 Nov 2018

Notes:

Added by Steve Hardaker sent to Catrin Hird

When exporting the GHX stock group, the image for 2510000 Microstim is actually the waveform diagram for DBS:

<http://www.viamed.co.uk/uk/Uploads/1A4611Aaef9A.jpg>

24 Apr 2017 Catrin Hird

Next Action Changed From Catrin Hird To Derek Lamb We have had problems with the images for ages which Derek was working on I believe. I have checked where I determine the website image for that list and it states <http://www.viamed.co.uk/uk/Uploads/Microstim.gif> as the primary.

Derek - please can you look into this.

29 Oct 2018 Derek Lamb

Next Action Changed From Derek Lamb To Catrin Hird catrin can you check these again please, been working on website recently, not sure if any of it works, but least Im in a position to fix if its broke now

31 Oct 2018 Catrin Hird

I have looked at this but unsure how the images are being determined from the website. Derek is looking into this so I will have a look again after he has troubleshooted.

31 Oct 2018 Catrin Hird

All should be working correctly now, the only ones which aren't are multipack part numbers as we only have 1 listed with reference to the other pack sizes in the memo.

01 Nov 2018 Steve Hardaker

Seems OK now.
