Hi William

It was nice to see you again at Medica, I am only sorry we did not really get the chance to speak.

With regards to the quotation for the TEK-OX with the additional decimal place, I can confirm that we would like to proceed.

Please let me know if there is anything you require from us?

Some additional information for this project:

a) This project initially is for the Weld Gas version, so the sample displays are to be upside down, like the current weld gas version.

b) Currently the weld gas version has the following words on the display:

1) WELD GAS 2) ANALYSER

We would like to change this to the US version of the spelling:

1) WELD GAS 2) ANALYZER

c) we may in the future look towards changing all the TEK-OX and VN202 Variants over to this new PCB and Display, please can you we make sure that it is completely compatible and programmable between one decimal place and two?

Thank you and best regards

Ryan

Hello Ryan,

I will be on Medica next week.

The quotation is still available for the change of the resolution. We can provide 5 samples in 2 month.

Best Regards,

William Pan
