Dear Peter

Quotation Number: 1803 / 2006

Re: BLU-OX V3.0 PCB Assembly

Thank you for your enquiry, I have pleasure in submitting the following quotation for your consideration.

1. BLU-OX V3.0 (This PCB will be stepped up to produce 35 circuits per panel)

35off Full Assemblies	£ 24.17 each
105off Full Assemblies	£ 19.96 each

PCB Artwork & Tooling
SM Paste Foil, Setup & Programme £ 485 (one off charge)

The above is on the assumption that we will have the ability to test the assemblies before they leave our site. We would need to consult with Viamed to determine a method of testing and allow time to implement some sort of test fixture before shipping.

Some of the components identified in the BOM we are getting lead times of up to 13 weeks. Giving an exact delivery timescale at this point would therefore be difficult. At the point of order we would look at if we can source some items on the grey market to improve lead times and give a more precise delivery date.

The above quotation excludes carriage and VAT.

THIS QUOTATION IS VALID FOR 30 DAYS.

I trust the above meet your requirements and assure you of our best attention at all times.

Yours sincerely

Nigel Harrison
