

SMTP Gmail Settings

Login to your Work Gmail account – NOT the main box

Click the Option Settings

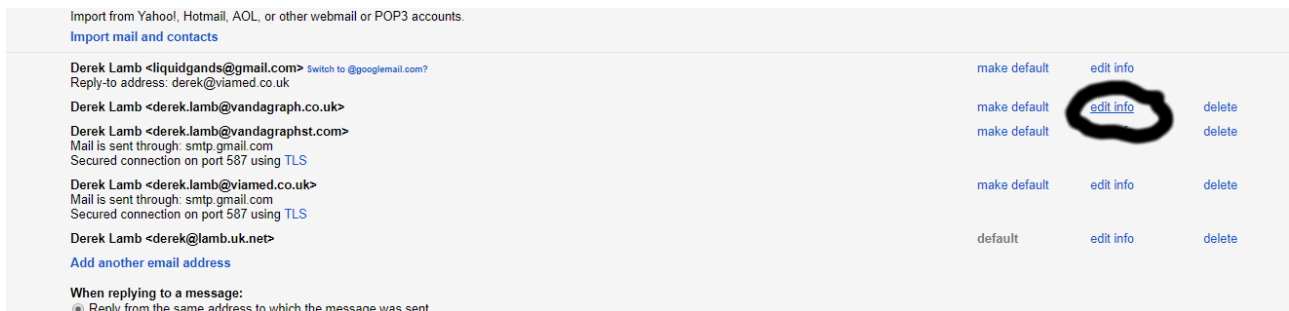

Click Accounts and Import

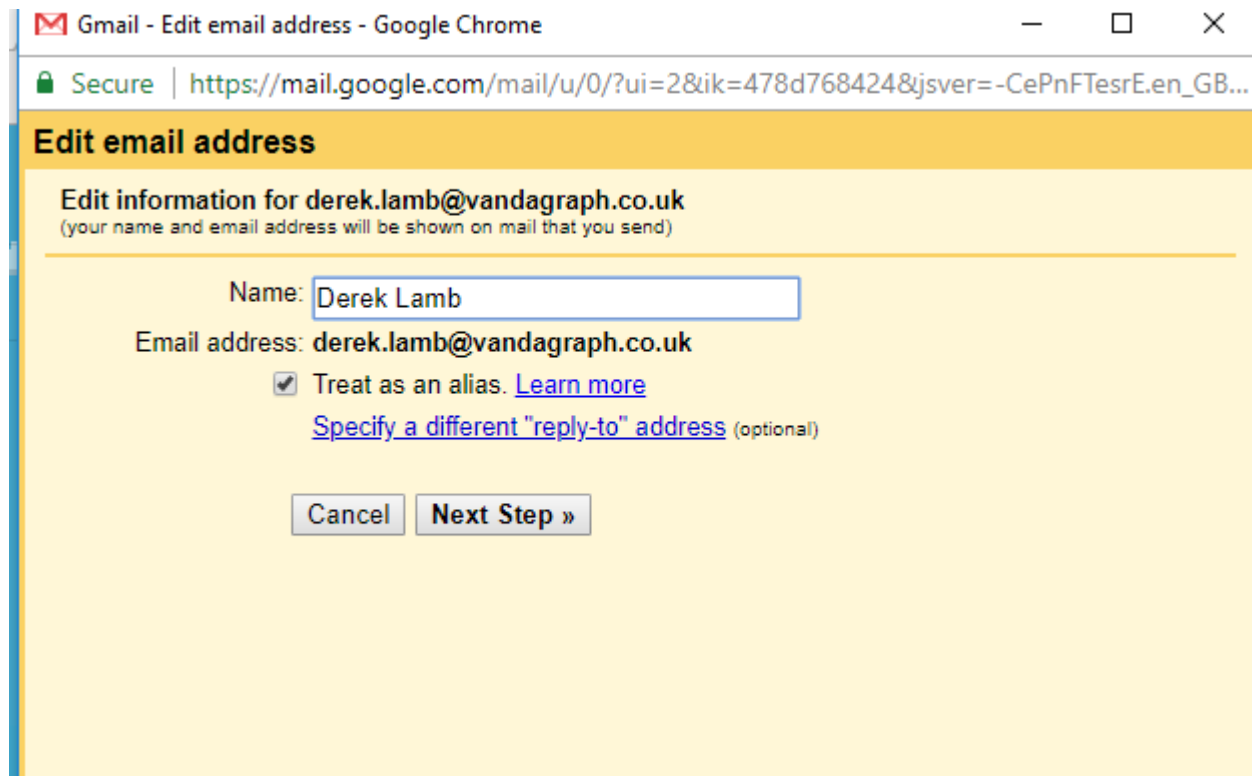

In the Send Mail as Section:

On the first NON gmail account click Edit Info

Leave the Next Page settings as is :

Click the Specify a different "Reply-to" Address

In the Box that opens up cut and paste the Email address setting into it, this should stop customer replys dropping in to the main box and go directly to your gmail account.

Click Next Step >>

Update SMTP Server smtp.gmail.com

Update Username viamedinbox@gmail.com

Update Password : crwyvhemisbdtyah

Leave other settings alone

The screenshot shows a web browser window titled "Gmail - Edit email address - Google Chrome". The address bar shows a secure connection to "https://mail.google.com/mail/u/0/?ui=2&ik=478d768424&jsver=-CePnFTesrE.e...". The page has a yellow header with the title "Edit email address". Below the header, there's a section titled "Send emails through your SMTP server". A message states: "Configure your emails to be sent through vandagraphst.com SMTP servers [Learn more](#)". Below this, it says "You're currently using: secured connection on port 587, using TLS" and "To edit, please adjust your preferences below." The form contains three input fields: "SMTP Server:" with the value "smtp.gmail.com", "Port:" with a dropdown menu showing "587", "Username:" with the value "viamedinbox@gmail.com", and "Password:" with a masked field of dots. Below the password field are two radio button options: "Secured connection using TLS (recommended)" which is selected, and "Secured connection using SSL". At the bottom of the form are three buttons: "Cancel", "« Back", and "Save Changes".

Click Save Changes.

Send a Test email from your gmail account, but select the send as email the one you just updated the settings for,

Send the mail to your @viamed.co.uk address.

1. You should receive the email into your account.
2. You should also see a copy of your sent email in the MAIN inbox sent mail folder.

Now do any other 'send as' addresses in your gmail settings accounts list. Use the same smtp settings for all email accounts.
