Hi Mike,

The MaxBlend 2 High Flow has a delivery range of 2-100 l/min max., and is supplied with a 70 L/min flowmeter.

To provide a working set-up, we also need to add air and oxygen hoses and a pole mounting clamp as follows:

- 0310293 - MaxBlend 2 High-Flow @ £1,750.00+VAT
- 0320216 - NIST Hose with Oxygen Probe, 3m @ £72.90+VAT
- 0320217 - NIST Hose with Air Probe, 3m @ £72.90+VAT
- 0320452 - Blender Bracket - Medirail/Pole Mount @ £65.00+VAT

In total, this equates to a total price of £1,960.80+VAT for a MaxBlend 2 complete with hoses and mounting clamp.

We can currently get devices on a lead-time of 2-3 weeks for around 10 units but the manufacturer, Maxtec, is experiencing unprecedented demand so lead-times can change at short notice.

I will chase the hose supplier now to confirm the current lead-time on hoses. If you already have 3m air and oxygen hoses with NIST connections, or if you make your own, please advise and we will remove them from the quote.

I will ask Zoey in our sales admin team to raise a quotation for you for 10 units with accessories as detailed above and will get that sent today.

Regards,
 Steve

Hi Mike,

Unfortunately no, we are completely out of stock of all types of blenders due to recent demand. If you can advise which type and quantity, I can get a lead-time for you.

Regards,
Steve

Hi Mike,

I've just been passed your enquiry for low flow air-oxygen blenders. We do still supply them but don't currently have them in stock.

These are available as low flow and high flow versions and can be supplied as a complete kit with hoses and a choice of pole or rail clamp.

If you can advise which options you need and an idea of the application, I will obtain a lead-time for you. I look forward to hearing from you.

Regards,

Steve
