Subject: Re: Sensor availability

Hi Jukka

Thanks for your email, things are a little crazy at the moment, but we are still processing orders within 1-2 working days.

R-17VAN - Available, but running short
R-22VAN - Available
R-33S1 - Available
R-22AEX - In production, should be ready next week

TEK-OX - Available

VN202: I am sorry to inform you that we do not currently have any VN202 analysers available, as all available stock and production had been prioritised for supply to the hospitals for use on ventilators for COVID-19 patients.

We have nearly fulfilled our obligations with the hospital and we are hoping to have replenished our stock for the middle to end of July.

Please let me know if you have any questions. Please call my mobile if you would like to speak to me, as our office lines are not being monitored.

Best regards

Ryan

Hi Ryan,

I have heard about the sensor production issue.

Do you have any of these in stock?

R-17VAN

R-22VAN

R-33S1

R-22AEX

We will make an order of VN202 and TEK-OX units and sensors.

Should we do it now even if you do not have sensors or wait better time?

Best Regards,
Jukka
