

Preliminary Information

TC400R

Wall Mounted Overhead Heater with Resuscitation facilities

One of the range of TC400 Low output Overhead heaters which has been specifically designed as a modular system allowing Clinicians and Nursing staff to specify their exact requirements .

The cabinet contains:

An integral white acrylic bed with a removable washable mattress

Racks to accommodate containers

Special shelf for emergency box (optional)

Medical rail to mount:

resuscitation equipment, suction unit & clock

The cabinet closes

The Heater arm folds away after use.
The output is a low level heater 400w

Specifically designed to create an area of warmth approximately 10 C above ambient room temperature

Reduces body heat loss

All surfaces have been manufactured to ease cleaning
