Hi Sarah,

All received with thanks.

I just wanted to check.

The molex p/o #2155 (100) I agree with. We received x38 on 4/6/20 and x50 today leaving a remaining x12 from this p/o.

I'm slightly confused with the coax.

P/o 2154, we received x 23 on 04/06/20

And then today we received x47 from p/o 2196 (100) with x2 replacements.

Does this mean that we are still owed x77 from p/o 2154 and x 53 from p/o 2196?

Also, can I take this opportunity to place another order:

200	COAX	P/O #2230
100	MOLEX	P/O #2231

Many thanks for checking for me and we are very grateful for the sensors we have received.

Kind Regards,

Christine
