Hi Gail

Please add their account (trade) and put a proforma on for 3x R-17VAN. Please add a note to let them know when they arrive into stock, so we can send the proforma and request payment.

Thank you

Hi Andre

Please send me your details and I will put you in our system to inform once stock is available, do you know how many you need (there are no minimum order requirements)?

Best regards

Ryan

Dear Andre

Thank you for your email.

The trade price for the R-17VAN is GBP £35 each EXW.

With regards to new R-17VAN sensors, we are unfortunately out of stock. O2 sensor production has been prioritised towards medical sensors and so our stock of scuba sensors has been delayed.

Unfortunately we do not have any confirmed date as to when they will be available, but it is likely to be a good few weeks or even a month or two before we have more R-17VAN available.

Please let us know if you would still like to order them.

In order to send you the proforma invoice, I will need your complete delivery / invoice address.

Best regards

Ryan

Hi Ryan
I need 3 please
Send to Thailand please .
I have a dive shop yes I wanna build something if it works I will use it for the dive shop.
It is for an experiment project 1st

Hi Andre

I would suggest we quote you through our sister company Vandagraph, as they specialise in sensors for gas analysers in the scuba industry.

We can offer you the R-17VAN which is comparable to the R-17MED.

Before we quote, please can you let me know where we would be sending the sensor, is the sensor for a scuba club, business or personal use and how many sensors do you require?

I look forward to your reply.

Best regards

Ryan

Hi Ryan
Thanks for your reply
I completely understand priorities :)
Through those times it is good that taking care first from those who need
I am interested in R17
Part number 0110017
I am on a project of gas analyser
Kind regards
Andre

Dear Andre

Thank you very much for your enquiry via our website,
I apologise for the delay in getting back you, as it has been very busy.

We are currently prioritising certain sensors for use in the ventilator projects for the treatment of Covid-19.
Please can you let me know more about your requirements?

Best regards

Ryan
