Good afternoon Jan,

Thank you very much for your email order.

I am very sorry but we are having supply issues at the moment.

With regards to new R-17VAN sensors, we are unfortunately out of stock. O2 sensor production has been prioritised towards medical sensors and so our stock of scuba sensors has been delayed. Unfortunately we do not have any confirmed date as to when they will be available, but it is likely to be a good few weeks or even a month or two before we have more R-17VAN available.

Also currently we do not have any VN202 analysers available either, as all available stock and production had been prioritised for supply to the hospitals for use on ventilators for COVID-19 patients.

We have now fulfilled our obligations with the hospitals and we are hoping to replenish our stock for the end of July.

We can still supply the TEK-OX. This is the same sensor and electronics as the VN202. The only difference being that the sensor is within the device, as opposed to the VN202 having an external sensor connected via a cable.

We are however able to supply the 10 x R-22Vans if you still require.

Kind regards

Gail Bell
