CHECKING AS LAST
CABINET HAD DIFFERENT
HOLE CENTRE SIZES*

HOLE CENTRES FOR WALL FITTING UNITS

The following hole positions are approximate, and may vary due to manufacturing and design changes. We recommend waiting for delivery before finalising positions.

ALL MEASUREMENTS ARE IN MILLIMETRES, AND CABINET HOLE SIZES ARE 6MM EXCEPT THOSE MARKED * WHICH INDICATES 12MM DIAMETER

For 12mm hole sizes, we suggest the use of 10mm expanding bolts, or similar, of a length suitable for the wall. As CD/INNERS are fitted within other cabinets, these hole positions are only partly relevant. The exact positions are affected by - choice of main outer cabinet, the thickness of that cabinet's raised base, as well as precise positioning within the cabinet.

N.B. DUE TO DIFFERING WALL CONSTRUCTION WE DO NOT SUPPLY FIXING SCREWS. THE CORRECT FASTENERS REQUIRED, MUST BE ASSESSED BY A QUALIFIED INSTALLER.

MODEL	NO. OF HOLES	A	B	C	D
