## WARRANTY DECLARATION

This unit has been inspected and tested to Penlon's meticulous standards. Should any problems occur you are covered by Penlon's warranty.

This states: All equipment marketed by Penlon is guaranteed for a period of twelve months from the date of the original invoice, and where defects occur as a result of faulty workmanship, it will be rectified or replaced free of charge, provided: -

- 1) There has been no modification or interference with any mechanism by persons other than a Penlon trained technician.
- 2) The product has not been used for purposes other than it was designed for.
- 3) That regular maintenance has been carried out by Penlon, its accredited distributor or an improved NHS technical centre, in accordance with the published schedule of servicing contained in the appropriate Instruction manual.

Rubber and plastic breathing hoses, bags, bellows and masks are similarly guaranteed, but for a period of 4 (four) months only, from the date of the original invoice.

You will note that the warranty is invalidated should the unit not be serviced during the warranty period. Please contact our Service office for details.

With a regular and professional service plan, the reliability and safety of the equipment will be enhanced.
