Dear Maciej

I am expecting a small shipment of R-33S1 sensors next week, so hopefully we can supply your order sooner than we thought if you decide to proceed.

R-33S1 = GBP £35 each
Airmail for two sensors (Tracked & Signed) = GBP £11

Please can you let me know if you have a company VAT number? If yes, please provide the number. If not, then we would have to add VAT at 20% to the pricing.

I will await your reply.

Best regards

Ryan

Dear Ryan,

thank you for your instant reply :)

Of course, I understand the situation, we will ask for two R-33S1 oxygen sensors.

I will also ask for information about the price with shipping to Poland.

Thank you for your email.

Please can you confirm which sensors you require? Is it the R-33S1 sensors?

Unfortunately, due to the pandemic, we are struggling for stock of Oxygen Sensors, as all production has been prioritised towards sensors for medical applications. I had confirmation from the manufacturer that our next batch of R-33S1 sensors that were due to be shipped tomorrow have not been put back to the end of September.

If you are needing the R-33S1, then I would suggest placing your order as soon as possible, so we can add it to the queue for when stock arrives.

I am very sorry for the inconvenience and I hope that things will settle down to some sort of normality in the coming months. Please let me know if you have any further questions
