Dear John.

With reference to your enquiry regarding the blue plastic End Cap to fit pipe union, We have pleasure in quoting as follows.

To modify the existing oxygen sensor mould tool to incorporate the End Cap,

Full Tool charge £575.00

Moulding Options

- 1 To mould Oxygen Sensor in Black Acetal price as previously quoted
- 2 To mould End Cap in Blue Acetal £13.81 per 100.
- 3 To mould Oxygen Sensor and End Cap in Blue Acetal £17.72 per 100 pair

We have enclosed a modified drawing of the end cap as we see it as a moulded product, with material removed to enable the product to be moulded, if this is not acceptable to you it is open to discussion on design changes. We also have the ability to prototype the product for you for evaluation purposes but a small charge would be incurred for this service.

We hope this quotation meets with your approval and if you have any queries please do not hesitate to contact the undersigned.

Yours faithfully

B. Walsh.
