Dear Brahim

Thank you very much for your email.

We would be very happy to work with you on your new project, can I assume that you need breath by breath measurements? If so, we can supply you with both the UFO sensor and the PCB that is required to run the ultra fast O2 sensors.

Please find some information attached.

If the UFO sensors look like they are going to be suitable for your requirements, then please let me know what you think your requirements are likely to be and we can give you a quotation.

Best regards

Ryan

Dear Manager,

We are Medical Equipment Europe GmbH (Lemon Medical Sister Company), a company that produces and develops products for lung-function, we sell our devices worldwide.

At the moment we are working on a new project that requires fast response O2 Sensor, your products look very interesting for us.

Is there a way to get a sample for testing, and what are the general prices for this O2 Sensor?

Thank you and Kind Regards.

Mit freundlichen Grüßen aus Hammelburg / With best regards from Hammelburg /
