Stock Reference	Description
8000004	Cable assembly for oxygen sensor 8010004
8010000	Oxygen Sensor - VST2200
8010001	Oxygen Sensor - APD5
8010002	Oxygen Sensor - APD11
8010002	Oxygen Sensor - APD11
8010003	Oxygen Sensor - VR1700
8010004	Oxygen Sensor - R17JJ-CCR
8010005	Oxygen Sensor - VST1700
8010006	Oxygen Sensor - rEvo CR22D
8010006	Oxygen Sensor - rEvo CR22D
8010007	Oxygen Sensor - NaNS01
8010007	Oxygen Sensor - NaNS01
8010008	Oxygen Sensor - NaNM01
8010008	Oxygen Sensor - NaNM01
8010009	Oxygen Sensor - VST1200
8010009	Oxygen Sensor - VST1200
8010010	Oxygen Sensor - RBL-23D
8010011	Oxygen Sensor - VR2200
8010011	Oxygen Sensor - VR2200
8010012	Oxygen Sensor - SC-I22D
8010012	Oxygen Sensor - SC-I22D
8010014	Oxygen Sensor - K-22D
8010015	Oxygen Sensor - UDT-22
8010016	Oxygen Sensor - Hammerhead HH22
8010017	Oxygen Sensor - VMS1700
8010018	Oxygen Sensor - Triton T22D
8010019	Oxygen Sensor - SG-22
8010019	Oxygen Sensor - SG-22
8010020	Oxygen Sensor - type 22D
8010020	Oxygen Sensor - type 22D
8010021	Oxygen Sensor - DST-2200
8010022	Oxygen Sensor - APD16
8010023	Oxygen Sensor - APD8
8010023	Oxygen Sensor - APD8
8010024	Oxygen Sensor - UDT-24
8010025	Oxygen Sensor -
8010026	Oxygen Sensor - MDS100
8010030	Oxygen Sensor - VST1703D
8010031	Oxygen Sensor - VST1704D
8010032	Oxygen Sensor - VST2200D
8010050	Oxygen Sensor - JFD (non-mag).
8010051	Oxygen Sensor - Avon (non-mag).

Stock Reference	Description
8010052	Oxygen Sensor - JJ-CCR DI (digital).
8010053	Oxygen Sensor - rEvo CR22D DI (digital).

VST Stock Meeting - Any Other Business

Issue ID #155584

Date Created 30/Sep/2019

Issued To: Sarah Walton

Completed Status: 11 Oct 2019

Notes:

Copy Issue Main Issue #155581

Added by Steve Nixon sent to Catherine Spence

I have added the following text to the pre-barcode instructions for the applicable VST sensors:

"Check whether the purchase order states a specific MONTH of manufacture. If so, verify that the sensor and bag labelling reflects the requested month. If not, please alert SN or CG or SW."

I was double checking the following. They have been received and are labelled as produced in September. They should have been October as per the P.O. and as per the factory confirmation.

VSTPO1006 100 x 8010008

VSTPO0981 100 x 8010020

VSTPO0995 50 x 8010020

We should be OK with the 8010008, but Divesoft will have issues with the 8010020 dated September. I am following this up with the factory.

We should be OK with the 8010008, but Divesoft will have issues with the 8010020 dated September. I am following this up with the factory.

30 Sep 2019 Robert Connor

noted, but please bear in mind I have to enter whatever date code is given when booking them in

11 Oct 2019 Steve Nixon

I believe that these have all been reworked with the correct labelling.

If this happens again, put the sensors `on-hold` then query as per the intrastats memo booking in.

15 Oct 2019 Robert Connor

ok, thank you

"Check whether the purchase order states a specific MONTH of manufacture. If so, verify that the sensor and bag labelling reflects the requested month. If not, please alert SN or CG or SW."

I was double checking the following. They have been received and are labelled as produced in September. They should have been October as per the P.O. and as per the factory confirmation.

VSTPO1006 100 x 8010008

VSTPO0981 100 x 8010020

VSTPO0995 50 x 8010020

We should be OK with the 8010008, but Divesoft will have issues with the 8010020 dated September. I am following this up with the factory.

VIAMED Stock Meeting - Any Other Business

34272 Stock Location Catrin

Issue ID #146040

Date Created 28/May/2019

Issued To: Derek Lamb

Completed Status: 02 Jul 2019

Notes:

Added by Catrin Hird sent to Robert Connor
Please can you check my stock location, 34272.

The only things I have in my possession are the 0121318 and the finger oximeters for eBay, I do not have any of the other products listed on my location.

29 May 2019 Robert Connor

The R17JJ should probably be linked to an invoice with JJ, Helen or Derek should be able to fix that.

As to the alcotrue, I have no idea what to do with that. As far as I know we do not have an unidentified one floating around in the warehouse, so that is currently unaccounted for.

29 May 2019 Catrin Hird

Next Action Changed From Robert Connor To Steve Nixon Steve, do you have this?

18 Jun 2019 Catrin Hird

Next Action Changed From Steve Nixon To Robert Connor Alcotrue has been given to JSL.

Only things now showing are 8010004 (which seems to have either not been scanned to order when sent or is missing) and the Sonotrax which I gave back to Jonathan to put away.

18 Jun 2019 Robert Connor

The sonotrax has been moved to the shelf it is sitting on in demo.
For the JJ sensor it looks like it should have been linked to VSTIN01105, I will see what I can do about this.

18 Jun 2019 Robert Connor

Sensor comes between VSTIN01086 and VSTIN01105 but is not listed on either of them, so I have no idea what is going on with this one.

18 Jun 2019 Robert Connor

OK, it does look like it should have been auto-linked to VSTIN01105 but was on the wrong location when Derek did it, just need to get Derek to link the ID.

18 Jun 2019 Catrin Hird

Next Action Changed From Robert Connor To Steve Nixon Please review.

Serial Number JJ118514

28 Jun 2019 Steve Nixon

Next Action Changed From Steve Nixon To Derek Lamb Derek, can you please resolve.

I believe that JJ113786 is on invoice string VSTIN00911 2017-07 and was shipped then.

It looks like somehow it has then been transferred to VSTIN01105 2018-10.

So:

JJ113786 should be on VSTIN00911 2017-07

JJ118514 should be on VSTIN01105 instead of JJ113786

Not sure how this has happened as the sensor serial numbers are 4728 apart.

Can you fix it or maybe just easier to add a note. The sensor JJ113786 is out of warranty, but the invoice would cover until October. Then again what are the chances that the sensor will be returned now after 2 years.

01 Jul 2019 Derek Lamb
fixed, not 100% but enough

02 Jul 2019 Catrin Hird
Ok thanks

I have asked Felix at Envitec to check their production parts stock, see email copy below. It looks like we have 600 cables in stock and production order for a further 200. We should schedule production for more and I will let you know what figures Felix comes back with.

Hi Felix

The following is just a quick check to ensure that the production department has sufficient parts (cables etc.) in stock for the production of following oxygen sensor:

E1001721, OOD103-2V

400 sensors - Purchase order VSTPO010151 scheduled delivery 11th March

500 sensors - Purchase order VSTPO010152 scheduled delivery 3rd April

500 sensors - Purchase order to be placed today, for delivery 5th May.

It is highly likely that we will need the following as a minimum, purchase orders will follow in due course:

400 sensors - for delivery early June 2020

400 sensors - for delivery early July 2020

400 sensors - for delivery early August 2020

04 Mar 2020 Sarah Walton

JJ-CCR R17JJ-CCR oxygen sensor

The annual sales quantities are very encouraging and are increasing year by year.

The percentage of sensors faults at just 0.36% is excellent, taking into account the usage, application and environments that the sensors are used in.

Total number of sensors sold: 23,318 (ranking No.1)

Total number of returns: 150 = 0.64%

Total number of returns deemed faulty: 84 = 0.36%

Total number of returns with no fault found: 14 = 0.06%

Total number of sensors returned out of warranty: 52 = 0.22%

morning steve

those number are high....well relatively speaking, i guess i cant really ask but are they in line with AP`s returns? or more a marked problem? just curiosity

we do but these sensors in a few different rebreather types now and what i don`t have is a breakdown of the rebreather being used with the sensors.

one thing to note with the sensors you cant find a problem with is after they are replace with a new sensor with the customer we don`t get any follow up issue reported, so does this mean there is a failure mode we are not detecting or cant replicate in the lab or the customer still have an issue but find the problem with the wiring on the rebreather, i really dont know!

Kind Regards,
John Routley

These cells are perfect- never had a failure in 8 years of using them. In fact they are so reliable it is costing N@90 money as I have decided not to buy the "spare" this time as all the previous spares were never opened.

As always tip top service from John and the team, dispatched very quickly and arrived the next day.

INFORMATION ONLY ISSUE DO NOT ADD NOTES!

Narked at 90 NaNS01 oxygen sensor

The annual sales quantities are very consistent year on year.

The percentage of sensors faults at just 0.41% is good taking into account the usage, application and environments that the sensors are used in.

Narked at 90 do tend to return sensors rather than investigate with their customers. They like to foster positive customer feedback.

Total number of sensors sold: 12,209 (ranking No.6)

Total number of returns: 85 = 0.70

Total number of returns deemed faulty: 50 = 0.41%

Total number of returns with no fault found: 16 = 0.13%

Total number of sensors returned out of warranty: 19 = 0.16%

As usually, simply perfect

One of the most reliable, trustworthy, durable and truthful sensors on the market. They are simply perfect.
Last one changed, after one year, performed exactly as new. What else to say?

I have been using these cells ever since I could no longer get even the non-D version R22`s. These seem to track better than the R22`s did. I use 6 - 2 completely independent sets of 3 per computer with no sharing staggered 6 months between the 2 computers. They always track very well throughout the year I use them

Placed a time sensitive order online for next day delivery and received it on time complete with a VAT return form as requested in the notes, so they read them. Good customer service. The cells themselves look like rebranded Vandagraph which are some of the most reliable available now that Teledyne are off the market, so all good there too.

INFORMATION ONLY ISSUE DO NOT ADD NOTES!

InnerSpace & Megalodon SC-I22D oxygen sensor

The annual sales quantities are consistent which is encouraging taking into account the issues that ISC have been subject to.

The percentage of sensors faults at just 0.18% is excellent, taking into account the usage, application and environments that the sensors are used in.

NOTES:

The number of returns is high. This was due to a storage issue and the pressure testing protocol of ISC being non-linear. The sensor design and specification was adjusted to take this into account. In addition, Megalodon do tend to return sensors without thorough assessment.

Total number of sensors sold: 14,213 (ranking No.4)

Total number of returns: 306 = 2.15%

Total number of returns deemed faulty: 29 = 0.18%

Total number of returns with no fault found: 99 = 0.70%

Total number of sensors returned out of warranty: 178 = 1.25%

<https://www.kissrebreathers.com/accessories.html>

CE Approved, our K-22D oxygen sensors are currently the best, most reliable oxygen reading cells on the market that are fit for use in rebreathers.

Manufactured by Vandagraph Sensor Technologies to the highest specification for exclusive use in our rebreathers, the K-22D features gold plated Molex connections.

If you need to question their proven reliability (resistant to becoming current limited) and quick response time, look to several other leading rebreather manufactures (rEvo, Megladon, Hammerhead, as well as supplier Narked @ 90), for they too call the Vandagraph the "official oxygen cell" for their own products.

The K-22D works with all models of rebreathers offered by KISS, as well as other rebreathers designed to use R 22D type cells with Molex connections.

INFORMATION ONLY ISSUE DO NOT ADD NOTES!

Vobster Marine VMS1700 Oxygen Sensor

The annual sales quantities are low but consistent year on year. This is good taking into account the development phase of the rebreathers and the R&D financial constraints that Vobster have experienced.

The percentage of sensors faults at 0.70% is good (but high for VST sensors) taking into account the usage, application and environments that the sensors are used in. The main skew of the statistics is not due with the sensor operation but loose/detached protective output caps during use (7).

Total number of sensors sold: 2,273

Total number of returns: 24 = 1.06

Total number of returns deemed faulty: 16 = 0.70%

Total number of returns with no fault found: 3 = 0.13%

Total number of sensors returned out of warranty: 5 = 0.22%

Work perfectly.

This is my second set of APD16, didn't have an issue with the first the whole 12 months they were in use.
Currently no issues experienced with the second set.

Using APD16 Oxygen Sensor (Coaxial)

The past diving season, I was using APD 16 sensors without any problem.

They were installed the 4/4/2015, and the past April 26th, the APD 16 sensors keep working. I think that AP16 are more consistent than APD14.

Good diversings

APD 16 O2 Sensors

I ordered two sensors, specifying APD 16 not 14, both arrived within the indicated time frame (2 weeks), one fitted as replacement for an older APD16 cell (still working OK but more than 18 months old so replaced, the other kept as spare / replacement for next oldest cell when due.

Normal good APD service and communication, APD16 cells seem almost as good (maybe as good) as the old Teledynes.

Dear,

I met your business over the internet. I am a designer and manufacturer of rebreathers Shark in Belgium. We are looking for a quality supplier for our oxygen cells. We currently use R22 type cells with coaxial contact connected to an AV1 controller. Do you have a product of your manufacturing to offer us? You can send us your sales conditions and product data sheet available.
Pending your reaction to our request greetings

Fineschi Michaël
Gérant,

MD Systems

20 Jun 2017 Steve Nixon
email 18th April

Hi, firstly please accept my apologies for the delay in getting back to you. We only supply sensors to manufacturers and I can see from your web site that you produce your own products. Do you already have CE certification for your products? As we move forward we will be discussing technical issues, so may I please ask you to complete the attached confidentiality agreement so as to protect both parties.

Can I also ask you to sign the attached waiver to confirm that Shark Rebreathers will undertake to carry out all relevant and mandatory tests to ensure that the oxygen sensors are fit for purpose, before including them as a component in any underwater apparatus used or supplied by Shark Rebreathers.

If you are already using sensors based on the R22 type sensors, then upon receipt of the above agreements I will supply the datasheet of a generic sensor that may be of interest to you. Please note that sensor characteristics and performance can be changed, so as to optimize for use with your equipment. The generic VST2200 sensor is based upon the R-22 series, but has a faster response and a wider range temperature compensation network.

Could you please advise how many sensors you are looking for on a per batch basis?

Kind regards

Steve

20 Jun 2017 Steve Nixon
email 19th April

Dear Steve,

I thank you for your reply.
I will answer your questions directly on your text.
Annex the signed documents.

Hi, firstly please accept my apologies for the delay in getting back to you. We only supply sensors to manufacturers and I can see from your web site that you produce your own products. Do you already have CE certification for your products? Currently the Rebreathers SHARK is CE certified by the QnetiQ laboratory in England. We expect that public sale will begin in mid-2017. As we move forward we will be discussing technical issues, so may I please ask you to complete the attached confidentiality agreement so as to protect both parties.

Can I also ask you to sign the attached waiver to confirm that Shark Rebreathers will undertake to carry out all relevant and mandatory tests to ensure that the oxygen sensors are fit for purpose, before including them as a component in any underwater apparatus used or supplied by Shark Rebreathers.

If you are already using sensors based on the R22 type sensors, then upon receipt of the above agreements I will supply the datasheet of a generic sensor that may be of interest to you. Please note that sensor characteristics and performance can be changed, so as to optimize for use with your equipment. The generic VST2200 sensor is based upon the R-22 series, but has a faster response and a wider range temperature compensation network. We use for our tests revo rebreathers cells which are R22. We also did tests with NRQ but not good results. We have been advised to ask you for your high quality manufacturing. Could you please advise how many sensors you are looking for on a per batch basis? We have not made any choice for the type of connection MOLEX or Coax SMB! Can you offer us on both types. For our tests, it would be necessary quickly three sensors of each type molex and smb.

Kind regards

Fineschi Michael

20 Jun 2017 Steve Nixon
Confidentiality and Waiver documents attached

20 Jun 2017 Steve Nixon
email 19th April

Hi Michael

I'm not sure what you mean by "We have been advised to ask you for your high quality manufacturing."

We can offer sensors with the traditional 3 pin Molex connector, but we can't offer certain SMB co-ax connectors as they have been assigned to specific sensors. If you let me know the part number SMB connector that is of interest, then I can advise if any variant is still available. Which SMB connector manufacturers have you been looking at?

Can you please advise me how many sensors you would require on a per batch basis.

I have attached the specification datasheet for our VST2200 sensor. If you wish, in a few weeks time I can supply some sample sensors based upon this specification. Of course we can change specifications in line with your requirements for your Shark Rebreather.

Regards

Steve

20 Jun 2017 Steve Nixon
email 20th April

Hi Michael

I'm not sure what you mean by "We have been advised to ask you for your high quality manufacturing." I hear that your manufacturing is reputable

We can offer sensors with the traditional 3 pin Molex connector, but we can't offer certain SMB co-ax connectors as they have been assigned to specific sensors. If you let me know the part number SMB connector that is of interest, then I can advise if any variant is still available. Which SMB connector manufacturers have you been looking at? Look in file attached the SMB coaxial that we want to use. But at first the Molex type 3 pin is good for us.

Can you please advise me how many sensors you would require on a per batch basis. Given the 12 months expiration of the sensors, I think we will order by set of 20 sensors in the first moment. Then following the sales of rebreathers the orders will be more important.

I have attached the specification datasheet for our VST2200 sensor. If you wish, in a few weeks time I can supply some sample sensors based upon this specification. Of course we can change specifications in line with your requirements for your Shark Rebreather. I think your specifications are correct for the Shark Rebreathers. Can you already send some test cells Molex type to us. If we want to customize the cells can tell you a reference and special mark on the sensors.

Regards

Steve

20 Jun 2017 Steve Nixon
email 3rd May

Hi Steve,

Since your last mail of April 20, I have more of your news
My request is urgent, we must make a decision to work with you for the development of our sales. Can you quickly supply us VST2200 sensor type cells in molex connector? We will test your sensor for our rebreathers. We need 9 test sensors in the best time for you.
Waiting for your reaction
Best regards.

Fineschi Michael
Adm-Grant

20 Jun 2017 Steve Nixon
email 3rd May

Hi, sorry for the delay, we will make a small batch of VST2200 sensors for you. We don't maintain stock as we released the main sensors six years ago and the established OEMs have their own specification sensors. Also, some of the more recent OEM enquiries concern bespoke designs, rather than the traditional R22 and R17 style models.

I will get back to you shortly with a delivery schedule. For a new batch to process through manufacture and QA takes 4-6 weeks and of course it is the peak season for sensors at the moment.

Regards

Steve

20 Jun 2017 Steve Nixon
email 25th May

Dear Michal

Do you still need the sample oxygen sensors VST2200 8010000 (R22 type, Molex connector)?

If so, can you please confirm that the shipping address details are as follows:

Fineschi Michal
Grant
MD Systems
Marine Diving Systems
2, rue de Meez
5500 Dinant
Belgium

20 Jun 2017 Steve Nixon
email 26th May

Dear Steven,

Yes I still need samples oxygen sensors VST2200 R22 Molex connector. Can you send me 12 sensors for testing on three rebreathers.

If you want I can pay for the samples!

Tell me for the next orders the unit price of the sensors and the delivery deadlines. If it is possible to customize with SHARK identification rebreathers stickers on the sensors.

Shipping address:

20 Jun 2017 Steve Nixon
email 29th May

Dear Steven,

We actually test 4 sensors including 3 main sensors and 1 sensor for an independent backup. But if you have already sent 9 sample sensors then this is fine.

Thank you in advance, waiting to receive the samples.

Best regard.

Fineschi Michael
Adm-Grant

20 Jun 2017 Steve Nixon

Hi, for our records can you please advise which is the main company, is it Shark Rebreathers or MD Systems?

For deliveries, should we address to MD Systems?

Regards

Steve

20 Jun 2017 Steve Nixon
Dear Steven,

MD systems is my company and SHARK rebreathers is the registered trademark of rebreather. It is well to MD systems that you must send the sensors as indicated address and name of the company below.

Fineschi Michael

Hi, I was just wondering how the oxygen sensors are performing for you?

Kind regards

Steve

20 Jun 2017 Steve Nixon

Dear Steve,

We have already tested on a rebreather and this seems to be correct.

We will be able to work with your sensors. I should now know the price and time of manufacture for a next order of 30 cells.

Best regards.

Fineschi Michael

20 Jun 2017 Steve Nixon

Shark Rebreathers oxygen sensor

VST part number: 8010026

Base sensor: 8010000

Hi, that is good news. I have attached the price list for the sensor based on the standard version that you are currently using. I have also attached another copy of the specifications. Please let me know should you require any changes to the specification or performance of the sensor design.

Do you want to purchase more sensors labelled as Vandagrph Sensor Technologies for testing purposes, or do you wish to go ahead with your OEM version?

If you are wanting to proceed with your version, we should start work on the artwork of the packaging and sensor labels. Can you please supply a copy of your company logo and let me know what contact details you require adding to the artwork layout. Perhaps you can use the artwork for our 8010000 as a guide, this can be found on in the specification datasheet. Do you also have a specific model or part number for your sensor?

Regarding serial numbers, do you just want an incremental number, or do you want it prefixed with a number of letter/s, such as:

- a) 000001
- b) 100001
- c) SR000001

Delivery lead time for unscheduled orders is usually 4 -6 weeks. However, unfortunately we have back orders at the moment. So we are currently working on 5 - 8 weeks, but we are working to catch up as soon as possible.

Should you have any queries or require any further information, please do not hesitate to contact me.

Kind regards

Steve

8010052 labelling artwork

Issue ID #156911

Date Created 17/Oct/2019

Issued To: Catrin Hird

Completed Status: 10 Feb 2020

Linked Files

17 Oct 2019 JJ-CCR logo artwork

21 Oct 2019 8010052 JJ-CCR Oxygen Sensor and Bag Label 2019-10-21

Notes:

Added by Steve Nixon sent to Catrin Hird

Can you please generate some examples of artwork for the oxygen sensor and bag labelling for a new oxygen sensor (8010052). FYI this is a `smart` sensor with digital interface.

Use the existing 8010004 artwork as a template.

See

Oxygen Sensor Specifications - 8010004, 2016-07-11

in L drive/VST/datasheets/JJ-CCR

Change sensor name from
R17JJ-CCR Oxygen Sensor
to
R17JJ-CCR DI Oxygen Sensor

Can you incorporate one of Jan`s logos, see attached. We are limited to the mono colour. Try, but the one with VERSATILE REBREATHERS text might be too hard to read.

Show examples without the existing JJ_CCR Aps text and with it in smaller font added to the address.

21 Oct 2019 Catrin Hird

Hi, unfortunately I did not create the artwork for the mentioned sensors so have had to recreate.

Please see attached and saved in T:Steve NixonFrom Catrin

VST Sales And Marketing - Sales

Asking for future sales order

Issue ID #167497

Date Created 03/Mar/2020

Issued To: Derek Lamb

Completed Status: 17 Jun 2020

Notes:

Added by Steve Nixon sent to Derek Lamb
Hi Derek, as discussed.

Monthly issues to be sent to Sarah on the 1st of each Month. If this works we can add more.

8010004 - JJ-CCR oxygen sensor orders

There should be at least two sets of orders on the system. Sales orders from JJ-CCR for this current month and next month, as well as the corresponding production orders.

If there are just two orders, send a VST email to Jan Petersen (jp@jj-ccr.com) at JJ-CCR asking if he wishes to place any additional orders for subsequent months.

We should be aiming for at least 2 to 4 scheduled orders on the system at any one time.

8010006 - rEvo oxygen sensor orders

There should be at least two sets of orders on the system. Sales orders from r-Evo for this current month and next month, as well as the corresponding production orders.

If there are just two orders, send a VST email to Pieter Decoene (Pieter@revo-rebreathers.com) at rEvo asking if he wishes to place any additional orders for subsequent months.

We should be aiming for at least 2 to 4 scheduled orders on the system at any one time.

04 Mar 2020 Derek Lamb
added 2 rolling tasks and associated audits

04 Mar 2020 Steve Nixon
Thanks, this will help stop unnecessary confrontation with customers.

It will also help with orders, this morning I asked for an order to cover May and by return he ordered 500 sensors.

Issue ID #196533

Date Created 10/Sep/2020

Issued To: Sarah Walton

Completed Status: 14 Sep 2020

Notes:

Added by Helen Lamb sent to Sarah Walton
Order ID RST124142 has no customer paperwork attached.

Please can you find the paperwork and add it also please make sure to add customer paperwork to all orders.

10 Sep 2020 Helen Lamb

Created Related Issue #196534

Added by Helen Lamb sent to Derek Lamb

Please can we implement the stage, previously planned, where sales office cannot proceed without customer paperwork attached to sales orders.

10 Sep 2020 Sarah Walton

Notes on order info say - 02 Jun 2020 Sarah Walton

Verbal order for SN. 100 x 8010012.

I always add a PO or email when I have one but SN speaks to Megalodon over the phone then tells me verbally. SN would be better to email me the details so I can attach or ask Megalodon to send in purchase orders so that I can attach those.

What shall I attach?

11 Sep 2020 Sarah Walton

Attached a hand written note.

VST Stock Meeting - Any Other Business
End of financial year stock valuation

Issue ID #195172

Date Created 27/Aug/2020

Issued To: Helen Lamb

Completed Status: Still Outstanding

Notes:

Added by Steve Nixon sent to Helen Lamb

Can't definitely help with stock valuation as the sales and stock transactions not showing up on Intrastats.

I believe that we didn't have any stock apart from the reserve stock of 100 x 8010006

27 Aug 2020 Helen Lamb
thank you

08 Nov 2019 VSTCR00046

08 Nov 2019 VSTIN01301

Notes:

Copy Issue Main Issue #158233

Added by Steve Nixon sent to Sarah Walton

We had sent 250 x 8000004 to Envitec FOC on invoice VSTIN01288.

They can not receive FOC no value stock with their new system. Therefore can you please reissue an invoice (do not send any more cables) to cover order 4414424917 (see our new order VSDORD01190).

As far as the system is concerned it will look as though we have now supplied 500 cables, can this be adjusted to reflect the true quantity of 250.

08 Nov 2019 Helen Lamb

Invoice VSTIN01301 and credit note VSTCR00046 to clear it from the system attached. I returned the stock when i did the credit.

In future we can just credit the value and not the stock, to keep the account correct.

08 Nov 2019 Sarah Walton

I have just spoken to Helen and she has now credited VSTIN01288 for the zero value and I will re-add another order with values on for invoice only and email to Felix. Helen was not aware that they would be paying for the goods.

08 Nov 2019 Steve Nixon

There is already VSORD01190 on the system for 250 cables. There does not appear to be a reason to re add another order.

08 Nov 2019 Sarah Walton

Yes that is the one I have just put back on the system.

Envitec has installed an new cloud based ERP (Enterprise Resource Planning) system

The supplier of this is SAP

SAP SE is a German multinational software corporation that makes enterprise software to manage business operations and customer relations. SAP is headquartered in Walldorf, Baden-Württemberg, Germany with regional offices in 180 countries.

There has been 10 software engineers from Honeywell (India) deployed at Envitec since January 2019 and they are still there, trying to iron out the problems. To save on costs they are utilizing old software licenses. Staff at Envitec are being `blinkered` to what systems and processes they have access to and operational functions have been split between offices in Germany, USA, India and Romania.

Flexible working hours, reduced hours and workers councils are also affecting procedures, production and customer services. Some staff have already left.

Historically we have been supplying parts for sensor production free of charge:

Cable assembly parts for VST 8010004 sensor.

Gas barrier bags for VST, Vandagraph and Viamed (medical & automotive) sensors.

Grey sensor casing parts.

The problem is that Honeywell and their new ERP system does not facilitate for the parts to be supplied and accepted into their systems without a value.

So the plan was to charge them for the parts, and I volunteered that they then increase to price of sensors to us by the corresponding amount. NOTE: Honeywell expects a margin on every process.

The Honeywell system does not currently allow Envitec to react to this, so for the time being the pricing of sensors to us has not been adjusted. As far as Envitec management is concerned, it is their problem/fault and therefore we should just as they say `pocket` the additional invoiced amounts. In time this will be resolved, but even with full Honeywell agreement it will take quite some time for the relevant departments to update their sections.

NOTE: We are just invoicing for parts costs, we are not charging for freight.

Added by Steve Nixon sent to Sarah Walton

Sarah - I have cc'd you on an email to InnerSpace, can you please add their P.O. 2020-69 to the systems.

If they confirm that they require the Vandagraph sensor 0110238, please add it at Â£35.00 to the same order.

Sarah / Cathy we will need to add the part number and description to VST for:

0110238

Oxygen Sensor R-22AT

We then need to send a P.O. to Vandagraph, Ryan is aware. It is OK to process at the same price, it saves two lots of invoices...

I'll add a warehouse request to replenish 8010012 ISC sensor stock.

NDA & Waiver attached - Needs VST signature

This company have developed a rebreather and have obtained CE accreditation.

They are currently buying from Narked at 90, they expect to need 200/300 / year

I have supplied sample pricing and specifications

07 Aug 2020 Steve Nixon

As discussed suggest to use reverse design connector of 8010023/8010007 based upon 8010024.

New part number to cover 8010027

07 Aug 2020 Steve Nixon

As discussed, see docs attached and as supplied via Skype.

19 Aug 2020 Ryan Swaine As discussed, customer would like the collar removing, (like APD/Narked). To mentioned to customer that the connector will be approx 1mm proud and they may wish to consider moisture issues by not having a shroud over the collar.

19 Aug 2020 Ryan Swaine

Company LOGO attached.

Company name: OTHER GRAVITY

Model: T-REB OXY-F

21 Aug 2020 Ryan Swaine Other Gravity are not concerned about moisture, as they state that even after 5-6 dive times it does not cause a problem

21 Aug 2020 Ryan Swaine

From a practical perspective, the connector being 1mm proud of the collar is not a problem.

Aesthetically they would prefer to increase the height of the collar by 1-2mm to cover the connector, but only if this is not a problem to do.

I suspect there would be tooling cost to increase the collar height, please can you confirm and let me know if it would even be possible?

Recurring monthly issue to be sent to Sarah

Envitec oxygen sensor parts stock check

Check to see whether in the past 6 weeks Envitec (Honeywell) have ordered any parts to used in the production of 8010004 R17JJ-CCR oxygen sensors. If no sales orders have been processed, please send a reminder email to:

Felix.Krellenberg@honeywell.com

cc. Jessica.Wagner@honeywell.com

Hi Felix

The following is just a quick check to ensure that the production department has sufficient parts (cables etc.) in stock for the production of following oxygen sensor:

E1001721, OOD103-2V

Parts to check:

8000004

E1002233

Kabel konfektioniert

Vandagraph Sensor Technologies

8030498

E1002231

Dichtungsring fÃ¼r Kabel 2,8mm

Vandagraph Sensor Technologies

8030499

E1002232

Kabelbinder

VIAMED Management Meeting - Other
Reminders for 8010004 production parts

Issue ID #173827

Date Created 16/Apr/2020

Issued To: Derek Lamb

Completed Status: 16 Jul 2020

Notes:

Added by Steve Nixon sent to Derek Lamb

I thought we set up a check stock for Envitec reminders, to say Sarah and or Cathy.

Also, I thought we set a prompt to ask Envitec for more orders for VST parts, to Sarah or me.

Are the above in place?

The attached relates to the 167 x 8010050 returned by JFD. Customer states that dimensions are out of tolerance

SRS generated 20th May

Spreadsheet supplied by JFD:

DB200381 SPREADSHEET OF SIZE JFD

Spreadsheet generated by SN:

Service notification number 300223888 - Data 2020-06-15

Summary

2 sensors batch Oct-18 out of warranty

4 sensors batch Dec-18 out of warranty

2 sensors batch May-19

26 sensors batch Aug-19

133 sensors batch Feb-20

7 reported as unstable (just 1 within warranty).

2 reported as failed mag test, this is out of our scope and control.

The remaining 158 reported as too large on the cap diameter. According to my measurements, 64 of these are OK, but failed on the output cap diameter measurement.

VST measurements taken using Mitutoyo Absolute Digimatic digital calipers

15 Jun 2020 Steve Nixon

Apart from the ones out of warranty, the sensors were shipped today To Marko Sproessel at Envitec via UPS, tracking number 1ZA8Y729D942432198.

15 Jun 2020 Steve Nixon

Next Action Changed From Steve Nixon To Derek Lamb Derek, can you please use the second spreadsheet to input data into the SRS database,

15 Jun 2020 Derek Lamb

All added to Tables,
filled in as much as I could, so think you just need to bring it up and check it

Status SRS67267

Issue ID #197999

Date Created 21/Sep/2020

Issued To: Robert Connor

Completed Status: Still Outstanding

Notes:

Added by Steve Nixon sent to Robert Connor

What is the status of SRS67267

8 x 8010012

Are they still at Viamed or have they been sent to the factory for analysis?

If sent to the factory do we have a report sheet?

21 Sep 2020 Steve Nixon

Created Related Issue #198003

Added by Steve Nixon sent to Catherine Spence

FYI

21 Sep 2020 Robert Connor

These were all sent back to EnviteC on RMA box 702 and credited.

21 Sep 2020 Steve Nixon

Good, thanks.

Have you seen a copy of the credit note with the faults listed?

21 Sep 2020 Robert Connor

I don't have it in my file, so I assume no.

"different things here,

1st is matching the VST purchase orders off against serialnumber barcodes,

And the VST_invoices history file of customer invoices.

Neither has been written yet,

bit are in place so not too far off.

been low on my agenda since VST not been doing anything

12 Jun 2020 Derek Lamb

will close this issue off,

manually fixed the PO,

the invoices are to be fixed in next week or 2

Issue ID #154257

Date Created 13/Sep/2019

Issued To: Zoey Teal

Completed Status: 02 Oct 2019

Notes:

Copy Issue Main Issue #154252

Added by Steve Nixon sent to Derek Lamb

INFORMATION ONLY ISSUE DO NOT ADD NOTES!

Stock reviewed - no current purchase order requirements.

Stock sales orders are covered by current stock and purchase orders.

Additional comments:

8010004: slightly more on P.O. this is to cover (in advance) some returns that are being processed.

8010012: 200 in the pipeline. In principle 100 for ISC and 100 for Megalodon. These quantities can be adjusted accordingly to meet customer requirements.

8010016: 3 remaining, these will be disposed of. These were samples of the proposed upgrade membrane assembly. Not used as Silent Thrill stopped purchasing and ceased business.

8010017: No sales order, but covered by pro-forma, Sarah is taking care of this.

NOTE: 8010030, 8010031, 8010032

Although these are old sensors they are being retained for development and demonstration purposes. The sensors have on-board Dallas chips (smart sensors). The sensors may degrade, but the smart sensor functionality can be demonstrated.

VST Stock Meeting - Any Other Business

Too many sensors are being booked in against some VST orders

Issue ID #193356

Date Created 11/Aug/2020

Issued To: Derek Lamb

Completed Status: Still Outstanding

Notes:

Added by Steve Nixon sent to Derek Lamb

Too many sensors are being booked in against some VST orders. How can this happen?

VSTPO01061 8010007 100 ordered, 122 booked in

VSTPO01061 8010008 100 ordered, 113 booked in

VSTPO01058 8010012 100 ordered, 137 booked in

Also VSTPO01061 now marked in grey?

29 Sep 2020 Derek Lamb

not sure how to deal with these,

we have booked in more against the PO,

i hope things would work them selves out but they havent ,

for the time being do I close off order VSTPO01061, its old style order so looking like its going to hang around for ever

29 Sep 2020 Steve Nixon

I suggest keep open until at least we fulfil line 1 for 8010007. It still doesn't explain where the 13 x 8010008 are.

Date Created 28/Aug/2019

Issued To: Derek Lamb

Completed Status: 02 Sep 2019

Notes:

Added by Steve Nixon sent to Derek Lamb

Did you deduce which are the correct sales figures for VST? Is it anything to do with two line items being the same on some invoices, i.e. zero value line for returns?

Graph totals

Sales totals

Totals in the returns screen

There are differences across the range, which total thousands of sensors.

For example for 8010006

Graph total shows: 19627

Sales totals equate to: 21467

Total units in the returns screen: 22986

For example for 8010022

Graph total shows: 17456

Sales totals equate to: 18200

Total units in the returns screen: 18922

For example for 8010004

Graph total shows: 22464

Sales totals equate to: 22918

Total units in the returns screen: 23319

29 Aug 2019 Derek Lamb

graphs at the top have gone a little astray, they taking short cuts to get the figures, usually was only ever plus or minus 1 or 2.

gone wild after i linked a lott of vandagraph tables in.

I've zeroed the numbers on the error table for now. will fix as soon as i see the actual cause
