

Brexit Contingency Plan

We do not expect our supply of goods to be affected by the current proposed withdrawal agreement and the Supply of goods from us will be unaffected in the event of a “no deal” scenario.

We have not increased our stock in preparation, as we do not foresee any supply issues.

We as a company have been importing from outside the EU for 40 years, as well as from in the EU. This has meant we are already prepared for the importation of goods from the EU after Brexit. We have checked on our existing systems and found them to be effective.
