Good Morning Ryan,

Just a follow up on last week's email.

The power button is yellow.

Kind Regards,

Sarah

Hi Ryan,  
Thank you for getting back to me

Can you send me a quote for a new meter please. I will look into getting the old one fixed at a later date.  
Can you please copy Sarah into the email as I won't be in work next week and she will be the one dealing with it.

Kind regards,  
Lindsey

Hi Lindsey

Thank you very much for your email and I apologise for my late reply.

We can still supply you with the VN202, the same as the one you have and we would be happy to also quote you for repair of your current device.

VN202 & Sensor = £110 (trade price, ExVAT, EXW)

If you require the calibration & certificate, as before, this has a further cost of £45.

I need to know if there are any fittings that you use or require? Are you connecting the device to a pillar valve?

Please let me know if you would like me to send you an official quotation. It would also be helpful if you could tell me if your current device has a yellow or green power button, as there are a couple of different models?

If you would also like us to quote for the repair of your current device, then I can send you a returns reference.

I look forward to your reply and please let me know if you have any further questions. If you would like to speak to me, please call my mobile, as our office lines are not currently being monitored.

Best regards

Ryan

Good Afternoon,

I am looking to purchase a new O2 meter as our old one has broken. I need something similar to the one we used to have model Vanguard VN202 Mk2. Please find pictures and a certificate attached to help finding another model.

Can you please send me a quote and a lead time for the delivery.

Kind regards,  
Lindsey
