Morning Ryan,

We seem to be struggling to get traction on this due to my tardiness.....apologies.

I'd like to place an order as per your description below;

We supply a number of our VN202 for use with Nitrox Sticks, it has a cable between the analyser and sensor. We can also offer a mounting bracket and wall bracket if required.

VN202 (manual switch off) = GBP £140 (+ VAT & Postage)

Wall Bracket and mounting plate = GBP £29 (+VAT & Postage)

My best,

Rob

Robin Kirkpatrick

Good afternoon Ryan,

I hope you can forgive my very late response. Things turned a bit hectic here.

I will go on-line and see double check the kit I need and revert with an order. I expect it to be the VN202 (manual switch off) along with the wall bracket and mounting plate.

My best,

Rob

Good afternoon,

Lockdown is well and truly upon us again and my thoughts are turning to a long delayed project - namely setting up a nitrox stick for my own gas mixing purposes (I currently use a partial pressure setup).

Do you have any analyser availability (with remote sensor) and could you let me know the price?

My best,

Rob
