Hi Ryan,

Many Thanks for the information, it is very useful. Would it be possible to get a few samples of 4420821 and 4420825. I would just like to try them and ensure they work with our unit before ordering?

If this is possible can you send them to my home address below.

Hi Robert

I am sorry for the delay in getting back to you, I am on leave this week and I have not been able to get to my desk as much as thought I would.

I can confirm that we would be happy to supply you with the Masimo compatible sampling lines, please find our selection guide and distributor pricing attached.

I will try and give you a call this afternoon.

Best regards

Ryan

Hi Robert,

Sorry I missed you, I will give you a call later if that's ok?

Best regards

Ryan

Good Morning,

I am a consultant working for a company who supply medical equipment with the Masimo Nomoline Capnography. I am interested to find out if you have a compatible range of sample lines to work with this? I am particularly interested in the product 4420825/26 which has a luer connector. Can you confirm this will work with the Masimo gas bench and if so would it be possible to receive a few samples? If this does what I need I can recommend to my principle we use Viamed as our supplier going forward for Nomoline gas lines.

If you have any questions please call me on the number below.

Regards

Robert Barr
