Yes please

I have attached leaflets for both the VN202 and TEK-OX. If you are just using the device to analyze cylinders, then the TEK-OX is probably the best option, as it is easy to use with a single handed operation. If you wish to use the device as part of your filling system as well as analysing cylinders, then the VN202 is often better, as the sensor is separated from the monitor via a cable.

Please feel free to give me a call anytime on the numbers below.

Best regards

Ryan

Dear Kathleen

Thank you for your email and I apologise for the delay in reply.

As you are a dive centre, I would be happy to extend to you our trade pricing, the R-22AEX is GBP £35

Postage to the UAE is currently subject to a surcharge due to limited transportation during the pandemic, the cost by Airmail Tracked & Signed would be GBP £16

**Total = GBP £51**

If you would like to proceed with an order, please let me know your complete delivery/invoice details and I will prepare a proforma invoice for you. Payment can be made by either bank transfer or credit card.

With regards to KISS sensors, unfortunately we do not offer any sensors suitable for use in rebreathers. I am sorry I can not be of more help with this.

I look forward to hearing from you and please let me know if you have any questions.

Best regards

Ryan
