Returning 3x 0110705 MLF-19 s/n 100059, 100060 & 100061 that have the wrong connector and looks like the wrong sensor body: it has a 3-pin Molex (see attached). It would make more sense that this is actually a different sensor with the wrong label applied.

Please check our stock before replacing; the customer is happy if we have to send the replacements in sealed bags instead of cans.

Added issue 227149 to SN to report to manufacturer.
