Subject: Re: FW: Ultramax O2 analyzer

Hi Ali

Please let me know if any of the following would be suitable:

Handi+ - has medical CE, no alarms, the sensor can not be changed, so you would dispose of the device once the sensor is depleted - part no 0111250 = EUR €133 each EXW

Oxiquant S - no alarms or medical CE - 0111275 = EUR €134.40

If you need the sensor to be separate from the device, then the following may be of interest to you:

MAXO2+AE - Medical CE, no alarms - 0111261 = EUR €256.90

Please let me know your thoughts and if you have any questions.

Best regards

Ryan

Hi Ali

Does it require Medical use certification? Do you need alarms?

Best regards

Ryan

Dear Ryan ,

We need the O2 Analyzer, but since we are tied to the budget we get the Greisinger or if you can quote something similar for cheaper price.

Hi Ali

We do not supply the Greisinger GMH3692, do you need the temperature monitoring or do you just need an O2 analyzer?

Best regards

Ryan

Hi Ali

It is likely to cause you trouble trying to import these devices into Russia, as there is a very expensive registration requirement there.

MAXO2 ME - 0111263 = EUR €450.50 each EXW

The MAXO2 ME has a galvanic O2 sensor which will require replacement every 1-3 years, depending on use. However, the design allows you to use it with O2 concentrators or ventilators and incubators for measuring the gas that is being delivered to the patient. It also has alarms for monitoring.

The Ultramax has an ultrasonic sensor, which does not require replacement. However, the device can only be used to measure the output of an O2 concentrator.

Best regards

Ryan

Hi Ali

Thank you very much for your email.

Ultramax Analyser - 0111265 = EUR €442 each EXW

Please note that the Ultramax is only for testing O2 concentrators and will not perform any other task.

If you would like us to provide a proforma invoice, please can you let me know the complete delivery and invoice details so we can provide the transport costs?

Best regards

Ryan
