

4000 Series

Soft Sensors

adult and paediatric durable, soft silicone sensors

The 4000 Series Soft Sensors

- 3rd generation soft silicone sensor
 - Robust and durable
 - Extremely accurate
 - Comfortable and secure fit
- **Patient types available**
Adult
Paediatric

VIAMED

Why should you choose the 4000 Series Soft Sensors?

Manufactured using the latest production technologies and materials for a durable and flexible design...

Extremely **durable** Silicone cable

Sealed and secure cable entry

Bio-compatible and latex free silicone to help **prevent allergic reactions**

Soft silicone for a **comfortable** and **secure** fit

Superior optics - for **accurate measurement** and **increased sensor life**

The robust silicone moulding means there is no hinge assembly to break as opposed to the standard hard shell finger sensor.

Compatible for use with:
Datascope, Datex, HP/Philips, Nellcor*
Nihon-Kohden, Ohmeda and Viamed.
*Non OxiMax technology.

Available in adult and paediatric sizes

Minimum risk of cross infection - can be cleaned by submersing in sterilisation fluid.

All these benefits and the **two year warranty** make the 4000 Series Soft Sensors extremely economical over the life of the sensor.
