Hi,

Please can we send a proforma invoice to Adnan Hashmat at Saim Medical.

Delivery to a UK address, so we will need to add VAT.

Please can you also put a note on the proforma with the balance that is to be paid for his outstanding invoice.

Thank you
Ryan

Hi Adnan

Please find our USD distributor pricing below (per sensor, EXW):

Analytical oxygen sensor for datex ohmeda 50 PCs:
R-30V (0110040) = USD \$70

Mox 20 PCs PCs:
MLF-60HV (0110707) = \$93

Mox 4 20 PCs.:
T-7V (0110058) = \$31.50

M03 compatible 20 PCs:
R-41V (0110041) = \$40

Oom204 envitec compatible 10 PCs:
R-47V (0110047) = \$69

Maquette oxygen sensor 10 PCs:
Please let me know which model of Maquette you require the sensors for, unfortunately we do not have for the Servo I

Please let me know the delivery details if you wish to proceed with the order. Please note that deliveries to the UK would be subject to 20% tax added to the above pricing.

Delivery costs to a UK address would be approximately \$15-£20 up to 20 kg.

Best regards
Ryan

Adnan

On Fri, Dec 11, 2020, 16:31 Ryan Swaine <office@viamed.co.uk> wrote:

Dear Adnan

I am sorry to inform you that we have a problem with the shipping of your order.

We tried to book a collection today with Parcel Force and unfortunately they have temporarily stopped their Global Priority and Global Value services to Pakistan due to carrier issues caused by the pandemic. The only service they are currently offering is Global Express, but this is a much more expensive service:

Global Express = USD \$603.74

You have paid for Global Value = USD \$437.96

Shortfall = USD \$165.78

Please see the following options:

- 1) We can ship with Parcel Force Global Express, but we would need a payment from you of USD \$165.78 for the shortfall
- 2) We ship by UPS Express Saver = USD \$299.93 and then we would then send you a refund for USD \$138.03

I am very sorry for the inconvenience caused to you, but we are unable to predict what effects the pandemic may have on your requested courier. Please can you let me know how you would like to proceed?

I will await your reply.

Best regards

On Thu, Sep 3, 2020, 5:15 PM Ryan Swaine

<office@viamed.co.uk> wrote:

Dear Adnan

Originally you required 200x sensors equivalent to the
M-04 / Hamilton Galileo, which we recommended the
R-24MED.

You have mentioned in your recent email that you
require them for the PB840, we would not normally
recommend the R-24MED for this.

There a number of versions of the PB840:

The early version requires the MAX-250 sensor

There are also a number which require the MAX-
250TM

The latest version uses the R-45V - Unfortunately it
could be a number of months before these are
available.

Please can you let me know which model you require
or supply a part number or picture?

With regards to the Datex-Ohmeda sensors, we will
have them available, but there are different models,
please can you supply more information?

Best regards
