

## **Device Description**

### **Cotlids**

**Flat sheets of transparent Perspex designed to fit over existing cots to retain heat**

**They are hinged in the centre to enable the infant to be removed.**

**The edges are returned over the cot outside edge to stop the cotlid falling off or into the cot.**

**Louvres can be fitted on request to enhance ventilation and escape of excess humidity when humid gas is being added.**

**The handles are recessed into the cot to allow ventilation**

**The Cotlid is also supplied without the hinge at customer request.**
