

Product Modification - Packaging

Part number: **0310030, 0310080, 0310093**

Model: **Tom Thumb TT480**

Historically Tom Thumb infant resuscitation units have been sold and shipped as an integral part of the infant resuscitation cabinets.

A packaging box is now required since:

- a) We are now selling Tom Thumb units as an individual product.
- b) The TT40 model is now becoming popular and is being purchased to replace model TT490 units.
- c) In order to comply with NHS framework requirements we need to have goods manufactured and to be readily available off the shelf.
- d) It is now preferable to have boxed goods available to be then scanned against resuscitation cabinet orders.
- e) Required to improve presentation and provide protection during storage and transportation.
- f) Required in order to affix labelling.

Box part number: **0350120**

Description: Rajapost brown cardboard postal box.

The internal flaps on this box provide postal protection that can help keep the product in place and offer additional support. Once constructed, the triple thickness of board on both sides of the postal box sides gives added strength. Shock proof high quality rigid flute corrugated board postal boxes provide strength and protection, and are easily closed with locking flap for a neat and smart looking postal box. Tape or strapping can be added to the postal box to improve sealing and security.

Supplied by: **Rajapack**

Rajapack part number: **RPT10B** (ordered via 'on-line' account).

Dimensions: **200 (l) x 140 (w) x 150 (h) mm**
