Hi André

I am sorry, we are still short of the R-33S1 sensors, they should have arrived by now. We are chasing them and I am awaiting a reply from Teledyne in the US. Sorry for the delay.

I do not have the capabilities to send you a payment link, would credit card be okay?

Best regards
Ryan

Hi Ryan,

I was hoping to add an analyser but sadly the client did not take the bait.
Have you received the Analox O2 sensors yet?

Regarding payment, can you send a payment link, or must I send you card details?

Warm regards,

André

Dear Andre

Thank you very much. Unfortunately having 3 sensor bumps
the price of the carriage up slightly.

Unfortunately we are currently out of stock of the R-33S1 sensors, but we are expecting more stock to arrive next week.

Best regards

Ryan

<office@viamed.co.uk> wrote:

Dear André

It is nice to hear from you. We are well, thank you. I hope you are too.

The situation is hopefully improving, especially with the roll out of the vaccination, but we are still currently in lockdown .

R-22AT = GBP £35 each

The only UPS service available to South Africa is Express Saver Service, and the cost for 1-2x sensors would be GBP £58, it seems that the prices have increased recently, sorry.

Please let me know if you have any questions or if you would like to proceed with an order.

Best regards

Ryan

Hi Ryan,

Hope all is well there? I'm keeping a keen eye on UK's c0vid status..
Our lockdowns were run by clowns, but it seems we are better off than you guys - even though the rest of the world thinks we have a "virulent strain".. we are running around as (almost) normal with no lockdowns - just the usual "keep your distances, wear a mask"...

Anyway, a client is looking for a Analox ATA Sensor. Part no. 0110238, R-22AT.
Can you please check what the shipment costs would be via courier please? (Not postal because our postal system is defunct.)

Warm regards,

André

Hi Andre

Yes, unfortunately we have been affected by the pandemic, as sensor production was prioritised towards medical applications. However we are now starting to get stock and we are working our way through the back orders. Our current lead time is approximately 2 weeks.

Best regards

Ryan
