#### 6.4.1

The organization shall document the requirements for the work environment needed to achieve

conformity to product requirements.

If the conditions for the work environment can have an adverse effect on product quality, the

organization shall document the requirements for the work environment and the procedures to monitor and control the work environment.

The organization shall:

a) document requirements for health, cleanliness and clothing of personnel if contact between such

personnel and the product or work environment could affect medical device safety or performance;

b) ensure that all personnel who are required to work temporarily under special environmental conditions within the work environment are competent or supervised by a competent person.

NOTE Further information can be found in ISO 14644 and ISO 14698 **Work environment**

updated as the design and development progresses.  
During design and development planning, the organization shall document:

- a) the design and development stages;
- b) the review(s) needed at each design and development stage;
- c) the verification, validation, and design transfer activities that are appropriate at each design and development stage;
- d) the responsibilities and authorities for design and development;
- e) the methods to ensure traceability of design and development outputs to design and development inputs;
- f) the resources needed including necessary competence of personnel

| <p>7.5.8</p> <p>The organization shall document procedures for product identification and identify product by suitable means throughout product realization. The organization shall identify product status with respect to monitoring and measurement requirements throughout product realization. Identification of product status shall be maintained throughout production, storage, installation and servicing of product to ensure that only product that has passed the required inspections and tests or released under an authorized concession is dispatched, used or installed. If required by applicable regulatory requirements, the organization shall document a system to assign unique device identification to the medical device. The organization shall document procedures to ensure that medical devices returned to the organization are identified and distinguished from conforming product.</p> <p><b>Identification</b></p> | <p><b>Top Level Document: VOP 07 Stock Control, Handling, Control of Labelling, Storage, Movement</b><br/>Revision Document ID75973<br/><b>**Date Revision 24 Nov 2021 Reviewed 24 Nov 2021</b></p> <p><b>Top Level Document: VOP 20 Goods in Purchases, Returns, Repairs, Inspection / Rejection</b><br/>Revision Document ID75943<br/><b>**Date Revision 24 Nov 2021 Reviewed 24 Nov 2021</b></p> <p><b>Audit 07 Handling and Storage</b><br/>Revision Document ID58347<br/><b>Date Revision 23 Apr 2021 Reviewed 23 Apr 2021</b></p> <p><b>Audit 09 Goods Inward and Product Identity</b><br/>Revision Document ID55437<br/><b>**Date Revision 12 Mar 2021 Reviewed 12 Mar 2021</b></p> <p><b>Audit 11 Repairs, Servicing and Returns</b><br/>Revision Document ID64142<br/><b>Date Revision 02 Jul 2021 Reviewed 02 Jul 2021</b></p> |  |

procedures to ensure that monitoring and measurement can be carried out and are carried out in a manner that is consistent with the monitoring and measurement requirements.

As necessary to ensure valid results, measuring equipment shall:

- a) be calibrated or verified, or both, at specified intervals, or prior to use, against measurement standards traceable to international or national measurement standards: when no such standards exist, the basis used for calibration or verification shall be recorded (see 4.2.5);
- b) be adjusted or re-adjusted as necessary: such adjustments or re-adjustments shall be recorded (see 4.2.5);
- c) have identification in order to determine its calibration status;
- d) be safeguarded from adjustments that would invalidate the measurement result;
- e) be protected from damage and deterioration during handling, maintenance and storage.

The organization shall perform calibration or verification in accordance with documented procedures.

In addition, the organization shall assess and record the validity of the previous measuring results when the equipment is found not to conform to requirements. The organization shall take appropriate action in regard to the equipment and any product affected.

conduct of audits shall ensure objectivity and impartiality of the audit process. Auditors shall not audit their own work.

Records of the audits and their results, including identification of the processes and areas audited and the conclusions, shall be maintained (see 4.2.5).

The management responsible for the area being audited shall ensure that any necessary corrections and corrective actions are taken without undue delay to eliminate detected nonconformities and their causes. Follow-up activities shall include the verification of the actions taken and the reporting of verification results.
