Dear Sarah

Thanks for the amended PI.

We ask you pls to revise it such as the model in attachment , we need the items written according to the certificates of registration.

Our customs should check the references in column 1 if they are identical to those in our certificates.

The R48V item (0110048) is not registered yet , we will tell you later how to send it separately. So pls remove it from the PI.

Looking forward to receive your feedback.

Dear Nadia,

Apologies, this is system generated so there must have been an error at the time of issue. This has now been corrected and the unit price is now showing on the amended PI I have attached.

It is extremely difficult to advise with an accurate lead time for each item until payment has been received. Our stock levels change daily and our policy is that stock can not be saved until payment has been received for an order. The only thing I can advise until payment has been received is that if anything is out of stock the lead time would be approximately 6 - 8 weeks. Sorry that I can not be more specific at this moment in time.

Kind regards

Sarah Walton

Dear Sarah

Thanks for the revised PI but you missed to write the price of 60x 4310002 spiro true flow sensor.

Pls add it and send the revised PI to confirm.

We need to know the delivery time of each item before confirming the order and sending the pre-payment.

Dear Nadia,

Thank you for your email.

Please find attached a copy of your amended proforma invoice. Our procedure requires us to add the bank charge to the proforma invoice whether as a separate line or included in with a unit price on one of the products on the order. I have now added it as a separate line for you.

I will only be able to advise exact stock availability once payment has been received, due to stock levels changing daily.

Kind regards
