

Description of Device.

Generic name of device: Nerve Stimulator

Model name: Microstim

Model number: DBS Mark 3

Brief description of device and other devices designed to be used in combination with it:

The Microstim DBS-Mk3 stimulator was introduced in 2004 as an updated design to the Microstim DB1000. The Microstim DBS-Mk3 incorporates ???????? features.

It still relies on the operation of a self-terminating switch. Once the cycle is complete the unit switches off until the switch is pressed again.

The overall casing of the unit has been re-engineered to be more “User” friendly and ergonomically manageable.

The basic electronics have been retained, but the PCB layout has been redesigned to fit with the new casing design.
