Hello Sarah,

It's been at least 1 month since I have to contact you regarding troubles with the Max12-a cells !!
In the picture attached, you'll see that after changing the cell and launching 21% and 100% calibrations, the customer is getting a message saying that the cell has been to be replaced shortly !!

Do you have any idea of why ?

In the meantime, could you please send me a proforma invoice for 2x R-17med ?

Regards,
