Please can someone raise a quote for 500x 0110058 T-7V sensors for Ortus, thanks.
Steve

Hi Steve,

I was talking to Matt yesterday and we're happy to progress with an order of O2 cells – the T-7V. We have conversation cables etc.

Could we get a quote for 500 units please, and I can get our purchasing team to raise a PO. In terms of delivery, could we get as many of the 500 initially, then in 100 batches please?

Best

Peter

Hi Peter,

Just a quick catch up on this as I will be on leave on Friday.

How are you getting on with those sensors, have you had a chance to look at your requirements?

Bear in mind that the wiring on these sensors is different, so some vents will currently require the R-48V (MOX-3) type and others the T-7V (MOX-4), unless Aoenmed have started issuing the conversion kits, in which case you will be looking primarily at the T-7V going forward.

I look forward to catching up with you at your convenience.

Regards,
Steve

Hi Steve,

We have and they seem to be working as expected. I'm up at our Worksof offices next week and will be reviewing stock.

Once we finalise what we want, I'll be in contact.

Speak soon

Peter

Hi Peter,

Just a quick catch up to ask if you have had a chance to try the sensors in your devices yet?

If there is anything that I can help with, please let me know.

Regards,
Steve
