Dear Kate,

First of all, sorry for inconvenience

In addition, I mean my **approximately** quantities are as the following:

1- 4310002 - Flowsensor SpiroTrue A (PC). Box of 5 , Qty: 250 box.

2- 4310003 - Flowsensor SpiroTrue H. Box of 6 , Qty: 100 box

So to give you my accurate ordered quantities, I want to know the outer carton's capacity (in which the boxes of sensors will be installed) per box, to avoid shipping incomplete or blank cartons.

Ex: if the outer carton can hold 45 boxes of SpiroTrue A, then my quantity for this item would be 270 boxes

Last , could you please mention the related lead time

Appreciated

Hi Samer,

Please accept my apologies, but I do not understand what you mean by one is Drager and one is Hamilton.

The part numbers are 4310002 - Flowsensor SpiroTrue A (PC). Box of 5 and 4310003 - Flowsensor SpiroTrue H. Box of 6.

Do you need the dimension for the box of 5/6 for part numbers 4310002 and 4310003? I have to obtain these sizes from a colleague, and I may be unable to do that today.

Thank you.

Kind regards

Kate Griffiths

Dear Kate,

For Drager one , I will order approximately 250 pack

For Hamilton one, I will order approximately 100 pack

But I need your support to determine exactly the quantity of each type , I need to ship full cartons

So if you can send me the sizes of your cartons per pack then I can give you my accurate quantities

Thank you Samer,

The price breaks are as follows:

1-24 = \$ 70.85 each pack of 5	25-99 = \$ 65.00 each pack of 5	100-249 = \$ 59.15 each pack of 5	250 or more = \$ 53.30 each pack of 5
-----------------------------------	------------------------------------	--------------------------------------	--

Please could I clarify, do you require 100/150 packs of 5, or the total of flow sensors to be 100/150 - ie 30 x 4310002, and 20 x 4310003.

I will use the Lebanon address for the invoice and delivery address.

Many thanks.

Kind regards
