Hi Sami

Just to confirm, is it the OxyQuant S that you would like me to add to your order?

Oxyquant S Oxygen Analyser - part no. 0111275 = USD \$152 each EXW

The OxiQuant S has a replaceable sensor. Please note that it is not registered as a medical device, so it should not be used for measuring the gases being delivered to a patient. It is suitable for testing equipment, such as O2 concentrators.

Best regards

Ryan

Hi Sami

Thank you for your email.

1) The Nellcor MAXNI SpO2 Sensor - Do you need these to be compatible with Oximax technology? If not, we may be able to supply, but if you need Oximax then we can not supply due to patent issues.

2) What sensors do you require for the Inogen G3 and G5? If you have a picture it would be useful, as we are not familiar with them.

3) One of my colleagues will be on contact very soon with your proforma invoice.

I look forward to your reply.

Best regards

Ryan

Dear Sami

Thank you very much.

I have attached the pricing for our VM-2160 SMARTsat pulse oximeter. As standard it would be supplied with an adult silicone sensor, but upon request we can replace the adult sensor with the paediatric sensor at no additional cost.

Best regards
