To: <jp@jj-ccr.com>

Hi Jan

Thanks for the new order.

Steve

Hi Steve,

The problem is that when divers are ordering sensors they expect to get sensors manufactord in the mounth they order them and not the mounth erlier,
anyway pleas prepare 600 for May also

Thanks,

Kind regards

Jan Petersen

Hi Jan

I'm sorry to hear about the delay, but we have no control over UPS...

We will try and get sensors earlier to you earlier in the month, but it sounds like you needed more sensors in February. Again we have no control over the sensor demand from customers, all we can do is to keep reminding you regarding any future requirements

The following is what is left on order:
600 sensors for April production.

Regards

Steve

Morning Steve,

So UPS made a screw up yesterday whit the delivery off the 400 sensor shipment it did not show up here, we tryed calling UPS and after 45min on the phone we got the ans that the shipment was in Malmo (sweden) due to bad wheater they said,

the fackt is that we had sunney wheater whit almost no wind all day yesterday here complt bla bla from UPS.

This means we will not be able to send sensors out today as planed it will be tomorow now and dives will not get them until start next week means only 6 - 8 days are left in march when divers have the sensors,

Can we pleas try to be ready whit the shipment earlier in the mounth.

Kind regards

Jan Petersen

Hi Jan

The 200 sensors are out for delivery to you:

Your shipment
1ZA8Y7290452713898

Estimated delivery
Monday, March 14 between 10:00 - 14:00

Are you OK for us to ship 400 tomorrow for scheduled delivery Wednesday?
