Great,
then yes, please go ahead and process a pro-forma for 3 x C69235A PC BOARD ASSY UFO 130.
I'm also attaching [@Dimitrios Charalambidis](#) who will fulfill the order and payment.

Thank you.

Aris

There isn't a link to the board, it hasn't changed.

Thank you for your prompt reply,
can you please send us a link for the board, i'm googling it and can't find it.
Also, please remember to 'reply to all'.

Thank you.

Hi Aris

1) We'd like to purchase **three (3) pieces** of your latest board, compatible with the O2 sensors we purchase from you.

Before sending to us, please send us a link of what you intend to send so that we rest assured it's what we want.

[The board is C69235A PC BOARD ASSY UFO 130 \(SURF\) BULK PACK](#)

2) have there been any changes to the electronics of the board lately? We're asking because of global shortage in a wide range of electronic components.

[We understand that no changes have been made.](#)

3) are there any news from Teledyne regarding the sensor's values movement when shaken?

No, as previously discussed Teledyne will not make any further comments as they view that you are using the boards out of specifications.

Do you want me to go ahead and process a pro-forma for 3 x C69235A PC BOARD ASSY ?

Steve

Hello again Steve,

We haven't heard from you regarding the purchase of the board and also I'd like to make a few additions:

1) We'd like to purchase **three (3) pieces** of your latest board, compatible with the O2 sensors we purchase from you.

Before sending to us, please send us a link of what you intend to send so that we rest assured it's what we want.

2) have there been any changes to the electronics of the board lately? We're asking because of global shortage in a wide range of electronic components.

3) are there any news from Teledyne regarding the sensor's values movement when shaken?

Thank you for your business.

Hi again Steve and thank you for your prompt reply!

- we're creating another experimental setup and I don't want to disassemble the previous one

- we want to see if Teledyne has a newer board that may be filtering out the errors caused by sensor movement (trying to examine even the very last resort)

Hi Aris, I'll get back to you on Monday.

What are your thoughts regarding another board?

Steve

Hello Steve,

We want to buy one more TELEDYNE's evaluation board.

Right now we have Model: UFO 130 Amplifier, however we want to purchase your **latest model!**

Just to be sure, what we now have looks like this:

I'm CCing @Dimitrios Charalambidis for costs and shipping communication.

Thank you
