Ryan

Hope you are well.

Can you please provide a quote for an additional set of parts (Same as your Invoice MAN136477, but Qty 5 rather than 2):-

9711906	Tee Blue No Valve	Qty 5
9711002	B-50057 Flow Diverter Single	Qty 5
0120131	Connector 15mm ID/22mm OD	Qty 5
0120133	Connector 22mm ID/30mm OD	Qty 5

Delivery

Please also include 5 off Oxygen Monitor units (TEK-OX), configured with an inverted display as usually ordered by our sales advisor Rupert Organ. I'm nor sure if these have a unique part number or how Rupert normally orders these, but I will try to confirm on Monday

Thanks

Graham

Hi Graham

Thank you very much.

Please find your proforma invoice attached. Please check all the details and let me know if any amendments are required.

Our bank details are at the bottom of the invoice or you can call us with your credit card details.

Best regards

Ryan

Ryan

Thank you, everything looks fine.

Please send a quote for a quantity of 2x each part listed, so I can prepare 2x full kits for review. I'll prepare the PO at this end.

Our office and delivery address is:-

Sarcostopper

[5-7 Brocks Way](#)

[East Mains Industrial Estate](#)

[Broxburn](#) (Nr. Edinburgh)

West Lothian

EH52 5NB.

Accounts dept. email is:- [accounts@sarcostopper.com](mailto:accounts@sarcostopper.com)

Please include carriage/delivery cost in the quote.

Thank you for your help.

Forgot to say previously in reply to your earlier question. The Tek-Ox analyser is bought by our Sales Consultant, who is in Finland and I hadn't heard of before this. If you wish, I'll forward your details to him. I'm not sure where he sources the analysers from. This all started when a supplier was taken over and didn't want to continue supplying the connecting kit as a product. The sales consultant had a stock of analysers but was short of connecting kits.

Regards

Graham

Hi Graham

Thank you.

Please find the parts listed with our trade pricing:

Blue Tee - 9711906 = £3.50

Flow Divertor - 9711002 = £3.00

Medium Barbed Connector - 0120131= £3.50

Large Barbed Connector - 0120133 = £3.50

Prices exVAT

Please let me know if you have any questions or if you would like to proceed with an order.

Best regards

Ryan

Ryan

Thanks for your help with this.

I am going to order a set of parts to make a sample kit. If all is ok, I'll order in batches of 50 approx. after.

As well as the standard A-268 Tee (9711906), can you please confirm which barbs I'll need (looks like two types) to fit into the ends of this? I see 0120131, 0120130 and 0120133 available.

Thanks & regards

Graham

Hi Graham

Thank you for your email and I apologise for the delay in my reply.

The Tee that is part of the sampling device (Quick-OX & DINKIT) is slightly different to the A-268, as it has a series of valves inside. However, I do not think you require the valves, I think you would be best with the standard A-268 Tee and some barbed connectors:

This system would allow you to add your tubing to either side of the TEE, having the barbed connector on the other side eliminates a potential venturi effect which could lead to a diluted reading, but will still allow the gas to escape and not create too much back pressure.

I can price up the parts for you, but can you tell me if you already have the TEK-OX analyser or should I put a package together for you?

Please let me know if you have any questions.

Best regards

Ryan

Hi

Can you supply details of the interface for your Tekox Oxygen Analyser 7910201 & 7910210? I think it is the same as on your A-268 Tee -Piece (97119006).

I need to find a fitting/adapter to connect some tubing to the unit, to sample the oxygen content from around an area to be welded.

Thanks

Graham
