

Returned membranes.

21<sup>st</sup> March 2005

Dear At,

Please find enclosed the 9 faulty membranes.

Further to my findings in my e-mail to you, the only other information I can add is to say that each of the membranes was attached to a front panel and tested. Each exhibited the fault noted. The membrane was removed and a replacement fitted. The replacement worked perfectly. So, I came to the conclusion that the first membrane was faulty.

Best wishes,

Peter Anderson
