

ENVIRONMENTAL POLICY

OF

Vandagraph Ltd.

1 INTRODUCTION

Vandagraph Ltd. is concerned in the design, manufacture, servicing, distribution and sales of medical products. We recognize that our operations have an effect on the environment and we wish to minimize the potentially harmful effects of such activity wherever and whenever possible. We also recognise that good environmental management must be an integral and fundamental part of our corporate business strategy.

2 POLICY STATEMENT

Our policy is to meet or exceed all environmental regulations, laws and codes of practice. We are committed to the prevention of pollution and to minimizing the impact of our operations on the environment. This environmental policy is the company's statement of environmental goals, which outline our commitment to continual environmental improvement.

3 COMMUNICATION TO STAFF

To be successful, the environmental policy statement needs to be company-wide and therefore commitment is required from the whole workforce. The Managing Director has specific responsibility for policy development, coordination and evaluation of performance. Line managers have an important role to play in helping employees to understand and implement the relevant aspects of this policy in their day-to-day work through the regular communication of objectives, action plans and achievements. This will be achieved through training programmes and electronic 'paperless' systems.

4 GOALS

4.1 Energy Use

We endeavour to use environmentally safe and sustainable energy sources to meet our needs.

4.2 Resources

We will improve our environmental performance by conserving energy, water, wood, paper and other resources, particularly those which are scarce or non renewable, through efficient use and careful planning, while still providing a safe and comfortable working environment.

4.3 Products

We will consider the environmental impacts of our products at all stages of their life cycle - from design, to manufacturing, customer use, and finally disposal.

4.4 Recycling

We will promote recycling and the use of recycled and refurbished products and materials where such alternatives are economical and suitable, while reducing consumption of materials wherever possible.

4.5 Waste Disposal

We will minimise waste, especially hazardous waste, in all our operations and product development and will dispose of all waste through safe and responsible methods.

We meet the requirements with regard to disposal of WEEE and hazardous waste in accordance with the WEEE Directive 2006 and The Hazardous Waste Regulations 2005 through a fully licensed waste management company.

In regard to the Waste Electrical and Electronic Equipment Regulations 2006 our Environment Agency producer registration number is **WEE/DJ1952ZR**

4.6 Wildlife

We will ensure that any products used or derived from wildlife, such as timber and plants, are from sustainable sources, and comply with EU and international trading rules.

4.7 Suppliers

We will work with our suppliers to ensure they recognize and reduce the environmental impact of their products and transportation through a quality purchasing policy.

4.8 Transportation

Through coordinating route planning and delivery schedules we will seek to realise the dual benefits of reduced fuel consumption and lower exhaust emissions.

4.9 Pollution

We will monitor relevant discharges and emissions to air, land and water to assess what action is necessary to reduce pollution or the risk of pollution. We will phase out, where practical, ozone depleting substances and minimise the release of greenhouse gases, volatile organic compounds, vehicle emissions and other substances damaging to health and the environment.

4.10 Buildings

We will ensure, where practicable, that buildings occupied by us are designed, constructed and operated to optimise their environmental performance.

4.11 Training

We include environmental issues in all company training programmes and encourage the implementation by all company staff of sound environmental practices.

5 POLICY REVIEW

This environmental policy will be reviewed regularly, triggered by an automated process generated as part of our quality management systems. If necessary it will be revised to reflect the latest developments. We will conduct on-going self-evaluation of our performance in implementing these principles and in complying with all applicable laws and regulations.
