Good morning,

Please can someone add an order for 100x 0110182 - R-22AVG for Glen Friedmann, Cryptonfix.

You will need to put a note on the order to state "Outputs below 12mV". I've gone through the QA data and have identified all the sensors in stock that are <12mV and have added a list to an issue to Cathy so that she knows which ones she can pick.

Note: he has signed his email as Tuning Supplies but the delivery address is the same, so I have asked if he wants us to change the account name, but don't let this hold up the order, we can amend it later if required.

Any questions, please feel free to ask, thanks.

Steve

Hi Glenn,

I've gone through the QA test data and we have enough in stock to get you 100 units of R-22AVG without outputs of less than 12mV.

Regards,  
Steve

Hi Glenn,

That's fine, we will get the sensors sorted and picked. You will end up with a non-consecutive run of serial numbers but they are all cherry-picked from the same batch.

Just one question, you have signed your recent emails Tuning Supplies but we have the account name as Cryptonfix Ltd, do you want us to change that for invoicing purposes or leave as is?

Regards,  
Steve
