MEC's medical case outlet is fully compliant to the requirements of ISO 9170-1. The terminal units feature a larger 51mm collar which is completely smooth, reducing the chance of dirt build up. The terminal unit also includes two independent springs for balance and durability. All second fix parts and boxes include a silver antimicrobial additive for inherent antimicrobial protection.

- Gas specific sockets with non-interchangeability
- First Fix supplied with a length of copper pipe
- Complete with fixing screws to secure both First Fix and Box to base plate
- First and Second Fix supplied
- Fully compliant with all current standards

# SUCTION | SUCTION CONTROLLERS

**High vacuum** is suitable for use in operating theatres, intensive care units, trauma and casualty units, wards and any application where high vacuum is required. The suction controller enables the vacuum to be set at any level from 0 to full pipeline vacuum. The vacuum gauge is marked from 0 to -100 kPa and 0 to -760 mmHg. **Low vacuum** is suitable for paediatric applications or where a vacuum not exceeding -20kPa (-150 mmHg) is required. The vacuum gauge is marked 0 to -27 kPa and 0 to -203 mmHg. **Thoracic suction** is suitable for abdominal or pleural drainage or where a vacuum not exceeding -7kPa (-53 mmHg) is required. The vacuum gauge is marked 0 to -10 kPa and 0 to -75 mmHg. **Controllers** are supplied with BS probes. Alternative probe types are available, including DIN and ULA probes. Units with remote probes are supplied with 2 metres of vacuum hose. Vacuum controllers are supplied with a gauge (marked in kPa and mmHg), disposable hydrophobic filter that acts as a safety overflow valve, an On/Off switch and vacuum adjustment knob. Manufactured to ISO 10079-3.

## ANAESTHETIC GAS SCAVENGING SYSTEMS

The AGSS is designed to conform to ISO 80601-2-13 and is used for the extraction of waste and excess gases, from the patient breathing system into the central anaesthetic gas scavenging disposal system. This is a device that safely collects and removes exhaled nitrous oxide and other anaesthetic gases during the administration of anaesthesia or sedation. The device is recommended by: AAGBI to avoid occupational exposure to the gases.

# TEST EQUIPMENT

**MEC** Test Equipment allows you to regularly check that medical gas pipelines are operating correctly to HTM02-01 guidelines. A comprehensive range of sets are available to test and calibrate medical gas pressure, flow and vacuum, ensure terminal units are gas specific and that active anaesthetic gas scavenging systems are adjusted to provide optimal performance. Particulate matter testing with purging allows checking for particulate contamination within the pipeline as well as purging from terminal unit or NIST points. Included in the range are dew point meters to identify contamination of pipeline systems by moisture.

- Two Pressure Guns to measure all eight pressure gases
- Third Gun to check vacuum
- Designed to check and calibrate British Standard Terminal Units for safe pressure and flow rates
- In compliance with HTM02-01 and relevant European Standards and all preceding standards
- Strong and sturdy Peli Box Case

CO2 analyser specifically designed to monitor CO2 for the verification of incubators in research and pharmaceutical markets. Developed to be fast, simple to use and accurate.

- Improved accuracy on CO2 readings
- Quick verification of CO2 incubator levels
- Time saving dual temperature probes
- Built-in gas moisture removal
- CO2 0-20%, O2 0-100%
- Dual temperature probes 0 to 50°C
- Humidity sensor 0-100%
- Large data storage and user friendly software and download

Instrument for testing medical, surgical and breathing-air systems (HTM02-01, Pharmacopeia and EN12021) up to 10 bar. Built-in electronic dewpoint meter, electrochemical oxygen cell and digital flowmeter. Tests CO, CO2, NOX, SO2, H2S and Polytest using Draeger chemical reagent tubes and oil using the Impactor. Colour touch screen menu driven display and rechargeable batteries. The unit also has a battery tray which accommodates 6 AA alkaline type batteries. In the event that the rechargeable batteries are not sufficiently recharged then you can continue to use the instrument with either the alkaline batteries or a mains power supply. Built in memory, downloadable to PC safe-air tester results software. Supplied as standard in PELI carrying case, also provided with:

- Duracell (AA) alkaline batteries
- Universal mains power adapter
- USB tester results download cable
- F2193 connection adaptor with CEJN plug
- Tube tip cutter
- Travel container
- Operating Manual

### SERVOMEX MINIHD (5200)

Rugged Portable Gas Analyser

- Compact, reliable and easy to use with long life and minimal running costs
- Non-depleting paramagnetic or infrared measurement technology ensures the unit is always ready for use
- Fast, accurate, reliable and component specific, with confidence that observed values are credible and not due to background interference
- Robust, IP65 case with protective overmoulding
- Customer pre-tested software and long life Li-ion rechargeable batteries for maximum ease of use
- Two versions available: Internally pumped or "AFCD" version for pressurised samples
- Avoids the problems associated with electrochemical or other less robust methods of analysis

MGPS1000WP

## MGPS 1000 GA

The All-In-One piped medical gas analyser for HTM02-01/ISO7396/NFPA99 gas testing

- Measures O<sub>2</sub>, N<sub>2</sub>O, Water Vapour, CO<sub>2</sub>, CO, SO<sub>2</sub>, NO, NO<sub>2</sub>, THC and GHC
- Integrated Oil, Polytest and Particulates Test.
- Connects to any terminal units or NIST with gas pressure up to 13 Bar.
- Paramagnetic sensor for O<sub>2</sub> (Electrochemical CE model)
- Infrared Absorption sensors for N<sub>2</sub>O, CO<sub>2</sub> and water vapour.
- Advanced Electrochemical cells to measure CO, SO<sub>2</sub>, NO<sub>x</sub> down to 0.01ppm.
- Simultaneous measurement of all mandatory HTM-02-01/NFPA99 gases and oil.
- Infrared Absorption water vapour measurement – much faster than current capacitive, electronic or chilled mirror sensors.
- Halogenated Hydrocarbons/ VOC using Photo Ionisation Detector (PID)
- MGPSReports PC software to upload data and easily generate test reports
- Built-in filter provides dry and clean air for automatic Air Calibration when needed.
- Precise temperature and pressure calibration for stable readings and reduced gas calibration.

MGPS1000CE

- Hose is PTFE-lined and sealed at both ends to minimise hose purging time and ensures gas sample integrity.
- Password protected access to ensure the integrity of the tests.
- Test results are shown with out of range values highlighted according to HTM02-01 or NFPA99.
- Gas test results, particulates, oil, odour and Polytest results are securely stored with sample IDs and user notes.
- Data can be uploaded to the MGPS-Reports PC Software or USB

## AIR PLANT

MEC provides a full range of Air plant systems from Simplex to Quadruplex. Plants can be designed with different capacities, physical sizes with a choice of screw, reciprocating and scroll compressors.

- Fully Compliant to HTM 02-01
- Available in a full range of variations
- All interconnecting pipe-work and wiring is supplied
- Fail Safe control system in the event of power loss
- Integral Alarm System Interface indicator
- All plants are tested and certified and are covered by a full warranty

## VACUUM PLANT

MEC provides a full range of Vacuum plant systems from Simplex to Quadruplex.

- Fully Compliant to HTM 02-01/ HTM 2022
- Available in a full range of variations
- All interconnecting pipework and wiring is supplied
- Fail Safe control system in the event of power loss
- Control panel is fitted with highly visible indicators and gauges
- Integral Alarm System Interface indicator
- All plants are tested and certified and are covered by a full warranty

## MANIFOLDS

MEC provides a complete range of manifold systems including Automatic, Emergency Reserve, Emergency Standby and Double Tail Pipe.

- Fully Compliant to HTM 02-01
- Available in a full range of variations
- Supplied with pre-set regulators and pressure sensors
- Highly visible readouts for cylinder content and pipeline pressure
- Both safety relief and isolation valves
- Available for wall mounting or free standing floor mounted variants

## A.V.S.U - AREA VALVE SERVICE UNIT

- Fully Compliant to HTM 02-01
- Fitted with BS EN 739 NIST connectors
- Fitted with a laser grooved Safe Break window
- Removable door for quick easy access, with reversible door hinges
- Sealed shut off NIST valves
- Standard pipework in 22mm and 28mm
- Each valve is supplied with blanking facility
- Every A.V.S.U is pressure tested with the valves tested for tightness

## LOCKABLE LINE VALVES

All valves are designed for maximum life with requiring minimum maintenance.

- Fully Compliant to HTM 02-01
- Lockable in both open and closed positions
- Pressure tested
- Tested for tightness
- A complete tamper proof locking device can be incorporated
- Solenoid Line Valves Available which are electrically operated and fully comply with HTM 02-01
- NIST Lockable Line Valves, each is supplied with blanking facilities

## ZONE SERVICE UNIT

MEC provides Architectural equipment that is designed for maximum life without compromising on quality as well as being cost effective and requiring minimal maintenance.

- Fully Compliant to HTM 02-01
- Available in Surface and Part recessed format
- Available from one to six gases
- Fitted with BS EN 739 NIST connectors
- Includes all internal pipework and stubbed
- Shire alarm panels fitted and tested, Connections outside of the Enclosure for easy fitting
- Pipework soldered using Inert Gas Joining
- Pressure Sensors fitted with minimum leak facility
