

## Pulse Oximetry CE FILE

History,

Pulse Oximetry products were developed in 1995/96.

Originally by TAI then by MCI and finally by Viamed.

There were several hundred individual products which are now obsolete.

The current electronic file includes as much relevant information as possible but there is so much of it that will probably never be viewed again the file has been truncated.

The full paper copy version is still available in Archives.

Electronic copies in PDF and Paperport Max files are available on CD and DVD.

### The main discs are as follows.

Viamed Pulse Oximeter Photographs;	March 25 2000
Oximetry CE files	June 2000
Note book diagrams	November 15 <sup>th</sup> 2000
